Cook With "Stored Heat" In This Electric Oven-Cooker

\$8.95

95c Cash \$1 Monthly

Universal Two-Heat Electric Oven-Cooker

For all kinds of electric cookery in the home. Does everything an oven will do. Roasts and bakes brown—stews—boils—steams and fricassees, enough food for an average family meal. Browns food perfectly, which steam cookers, pressure cookers and so-called fireless cookers will not do. Cooks large-ly by stored heat and uses less current than an electric iron. Has two heats—"high" and "low." "High" heat rapidly brings the oven cooker to temperature desired and then, because of its effective insulation, the cooker maintains this temperature with "low" heat. The low operating cost and reduction of food shrinkage in a short time save the cost of this cooker many times over. Operates from any electric outlet. Equipped with three separate clamp cover containers. Food prepared in the oven-cooker at home can be served hot from it at picnics or other outings.
