Peace Moves In Europe

ROME, Dec. 5.—Germany and France clasped hands across the no-man's land of the troublesome Saar Monday in an accord tending to assure this part of Europe at least a temporary breathing spell of peace.

PLANE LOST IN WATERS OF OCEAN AT HONOLULU

HONOLULU, Dec. 5.—Patrol planes roared in wide circles last night above 23 navy searching craft and scores of Japanese fishing sampans as darkness gathered over the waters where Flight Lieutenant C. I. P. Ulm's Honolulu-bound monoplane dropped when its fuel gave out.

Meanwhile, the liner President Coolidge reported arrival at the spot where the plane and its three passengers were believed to have touched the sea. No trace could be found of the missing fliers whose frantic message "will land in the sea" urged rescuers on.

Added hope the men, en route here on the first leg of an air dash to Australia, might be found came in form of aid by the Japanese fishing fleet. Nightly these craft put to sea for cruises taking them several hundred miles out.

Searchers did not know exactly where to look but they believed Ulm and his companions might be adrift within 100 miles of Oahu island, on which Honolulu is situated.

DOG WAITING FOR MASTER TEN YEARS

ROCK ISLAND, Ill., Dec. 5.—A loyal Scotch collie has completed ten years vigil at St. Anthony's hospital here awaiting the return of his master.

Back in 1924, Francis McMahon of Erie, Ill., bred his faithful dog to serve as hospital attendant, took him into the elevator on a stretcher. Suffering from a fractured skull as the result of a fall, McMahon patted the dog's head and told him to remain in the lobby.

The next day McMahon died and the dog settled down for his long night.

At first he refused to eat. Slowly and cautiously he made friends with a few sisters and nurses, but still maintains a sullen attitude toward all but a few. He is 12 years old.

SLEEPING BEAUTY NOW RETURNING TO LIFE

CHICAGO, Dec. 5.—The unbroken slumber which for 33 months has enfolded Patricia Maguire began slowly to unloose its grip today.

She heard her mother's coaxing voice, and drowsily, feebly obeyed simple commands. Pat held up a thumb; Pat extended her right finger; she wiggled her right foot, and once her eyelids twitched.

Two weeks ago the sleeping beauty of Oak Park astounded her family by a pathetically indolent response to suggestions printed on a slate.

Now her mother, fired by faith that Pat some day will return to full consciousness, hopes to hear her speak. Since Feb. 15, 1932, when the girl fell into an exhausted torpor, she has not been aroused to consciousness.

Personal Mention

Dr. and Mrs. G. B. Lynch and Mrs. Brown Carr returned Tuesday from a week's motor trip to Washington, Baltimore and New York City.

Mrs. Clyde Whitlock and son of Hendersonville were guests Sunday of Mrs. Dewey Wood.

Mrs. B. F. Beasley has recovered from a serious illness of the past three weeks.

PRODUCTION GAINS BY CHEVROLET

DETROIT, Dec. 6.—Production of Chevrolet passenger cars and trucks for the model year 1934 will show an increase of approximately 35 per cent over corresponding figures for last year, it was announced here today by M. E. Coyle, president and general manager of the Chevrolet Motor company.

Analysis of this production shows that all three Chevrolet lines—Master models, Standard models and trucks—made gains in 1934, the highest percentage of gain being registered by the Standard series, the world's lowest-priced six-cylinder car.

Some idea of the bearing which this added production has on the country's economic recovery may be gained from Mr. Coyle's statement that payrolls for the first 10 months were 45 per cent greater than for all of 1933. Wages and salaries paid to Chevrolet employes, up to November 1, totalled \$87,606,994.59, he said.

The greater part of the money accounted for in the present report, Mr. Coyle pointed out, went to productive labor employed in the Chevrolet manufacturing and assembly plants throughout the country. The figure represents Chevrolet's direct payrolls only. It does not, of course, touch the vast expenditures for materials used in Chevrolet products, nor does it include wages paid to employes of the Fisher Body corporation, makers of bodies for Chevrolet cars, nor to the 50,000 sales and service employes of Chevrolet's 10,000 dealers blanketing the country from coast to coast.

You Can Eat With False Teeth But You Can't See With False Eyes

Many individuals are able to do a pretty good job of eating with false teeth, but did you ever hear of anyone seeing with false eyes?

The eye is one of the most delicate as well as one of the most important organs in the human body. Under modern conditions most of us abuse our eyes terribly. In most of our homes we read, sew, play or work under an average of five to 10 units of light. Five thousand to 10,000 units of light are available outdoors on a cloudless day—on such a day there is approximately 500 units of light in the shade.

The result of the atrocious lighting conditions that are found in most of our homes and schools is that 25 per cent of our children are found to have defective vision by the time they finish high school—by the time they finish college this proportion has grown to 40 per cent. Think of it! Two youngsters out of five handicapped for life during their school years as a result of studying under improper and insufficient light!

The I. E. S. study and reading lamp has been designed by illuminating engineers to meet this situation. It provides "proper" lighting as well as "adequate" light for study, reading and other occupations calling for close visual application. This lamp, equipped with a 100 or 150-watt bulb, may be had for

For general purposes and general illumination we recommend the I. E. S. specification floor lamp with the three-light bulb. This lamp gives you three lighting levels—100-watt, 200-watt and 300-watt, being thus adjustable for whatever purpose one may desire to use it at any given time. This lamp may be had for

50 cents down, \$1.00 per month with your light bill.
