Out-of-Door School Opens At Rockbrook For 2nd Term Here

Miss Fanneal Harrison, director of the Out-of-Door school, of Sarasota, Fla., has opened the fall term at Rock Brook camp, near Brevard, on the Transylvania county estate of Mr. and Mrs. Henry Carrier.

This is the second year the school has enjoyed the mountain season before going to Florida. Last year the enrollment was limited to 20 and it was so successful it has now been raised to 30.

The staff of 14 college men and women from various parts of the world bring a rich background of culture to the children. Such widely scattered spots as Yarmouth, Nova Scotia; London, England; Honolulu, New York, and Chicago, are represented among the teachers.

The children, both boys and girls, range in age from six to 18 years. The morning is spent with their lessons and individual attention is given to develop the fullest capabilities of each child. A number of high school students are preparing for college board examinations.

The afternoons are devoted to sports, horseback riding, hiking, swimming, canoeing and visits to local weavers, potters and tanners.

Most groups carry on an intensive study of the early history of the region. Science lessons are based on the geological formation of the mountains, and the trees and flowers found hereabouts. Child health is an important consideration and building up a strong physique of paramount importance. The school nurse is a graduate of a well known New York training school and has had long experience with children. Their diet is supervised by a graduate dietitian.

The first week of November the school moves to Sarasota, Fla., driving down by bus and motor and stopping over at places of interest on route. There, the same curriculum is followed, the staff is enlarged and day pupils are accepted which brings the registration up to 100 or more. Last season it was 110.

All boarding students entering as freshmen will begin their registration and classification on Monday afternoon at one o'clock. All boarding students entering the sophomore class will be registered and classified Tuesday morning beginning at nine o'clock in the morning. It is expected that practically all students will arrive and have their locations settled by Monday night.

to give college credit for business courses combined with other academic courses. If a student is classified in this way he will be spending two years in the college complete the required hours for graduation from the institution. There will be other business courses offered which will require one year for completion, but in such cases college credit will not be given for the courses. Students who combine the business courses with other academic courses will receive the college diploma at the end of two years and at the same time a certificate for the completion of the business course. Several other institutions in the state have indicated their willingness to accept graduates of Brevard College who take business courses in this way. The Woman's College of the University of North Carolina, High Point College, Catawba College and the Western Carolina Teachers College are now giving degrees for courses which include a minimum number of hours in the commercial field.

The formal opening of the college will be Wednesday morning, September 25, at 10 o'clock. Dr. C. C. Weaver, pastor of Central Methodist church, Asheville, will be the principal speaker at that time. Friends of the college living in Brevard have been given a cordial invitation to attend the opening. BEAVER COLONY IS INJURING CROPS

Dam Near Rosman Threatens To Cause Drastic Move By Farmers

The beaver colony on the old Zachary farm near Rosman is becoming a menace to farms in the immediate sections and it is believed that eradication or removal will soon be necessary.

People in the community near the beaver dam have been "making allowances" for the beaver's food and keep, but they feel that when the colony goes out in a single night and cuts around a hundred stalks of good river bottom corn, that the animals are taking a little too much leeway.

The beavers have attracted much attention during the two years that they have made their home in the old channel of the French Broad just below Rosman, and many people from other states have come here to see the dam which the beavers have constructed.

Effort is being made by people in the community to have the beavers trapped and removed to some national forest area.
