BREVARD, NORTH CAROLINA, THURSDAY, NOVEMBER 5, 1936.

\$5.00 PER YEAR IN TRANSYLVANIA COUNTY

ELECTION GOES OFF VERY QUIETLY HERE

Usual Disturbances Absent in Brevard Tuesday Afternoon and Night

The general election in Transylvania was comparatively quiet, according to reports coming to The Times office from various precincts in the county.

In some instances, drinking was noticeable to a more or less marked degree, but there was no general trend toward boisterousness.

At Brevard on Tuesday night, most of the business houses had closed their doors by six o'clock, and with the exception of one cafe, all had closed before 7:30.

The usual street fighting seen here on presidential election nights was absent, with the exception of a couple minor "scrimmages" which did no real damage and involved only a few people.

One young "mademoiselle" was placed in the county jail about 8 o'clock Tuesday night, after she had evidently taken too much election joy water. The woman had entirely passed out when officers were notified that there was a dead woman down on Caldwell street.

Some chap had just a little different idea from what perfume really is, and caused quite a bit of consternation by bringing a pole cat into town, and parading it in the uptown section.

Returns from the county, the state, and the nation were broadcast from the Sledge-Bromfield electric shop, with the board of elections and The Times cooperating in keeping the large crowd about the public square and in front of the court house informed as to trend of the vote counts.

The morning business sessions of the two groups were held separately, and a joint session was held in the afternoon. Addresses were made by Gov. T. E. Newton, state manager of the W. O. W., Mrs. Effie Rogers, state manager of the Woodmen Circle, and Gov. Barrington Hill, past state consul commander.

Brevard Boy On Navy's Team

Jack D. Miller, of Brevard, is a member of the Navy's football squad, playing the center position on the first eleven. He is in the class of 1937, is 21 years of age, weighs 174 pounds, and is 5 feet 8 inches tall. He prepped at Brevard high school. Though rather small for a center, Miller is hard working and aggressive and has leadership ability.

Navy's football season has passed the halfway point and shows a record of three wins over William and Mary, Davidson and Virginia against three defeats by Yale, Princeton and Pennsylvania. But no time can be wasted mourning defeat with such opponents as Notre Dame and Harvard coming up on successive Saturdays. These games are all preliminary to that classic of the season in Philadelphia on November 28 against Army. Every member of Navy's squad has his heart set on a win over Army.

Milford M. McCall Is Heart Trouble Victim

The people of Transylvania county were shocked when the news was rapidly spread from Liberty, S. C., last Friday, October 30, that Milford M. McCall was suddenly stricken by death.

Hunters Bag 36 Buck Deer in Pisgah Hunt

Approximately 200 people are scheduled to hunt in the forest during the week. In the preliminary hunt before the forest-wide one which starts November 16. The people hunting this week are those whose names were drawn to hunt last year, but were not permitted to do so on account of hunt being cancelled.

Duke Power Announces Big Reductions in Rate

CHARLOTTE, Nov. 4.—A saving of \$1,100,000 to customers through reduction of gas and electric rates was announced here last week by officials of the Duke Power company.

An unusually good volume of business by the company during the year, attributable to the fact that business has been good for the power company customers, particularly the textile industry, and the fact that 1936 has been a good "water year" were given as reasons for the action of the company.

Coincident with the announcement, Commissioner Stanley Winborne of the North Carolina Utilities commission, and Chairman Jas. W. Wolfe of the South Carolina Public Service commission, announced in detail new schedules of rates.

Commissioner Winborne said that North Carolina customers would get the benefit of \$733,000 annually. The power company said the reduction had not been divided by states, but it was pointed out that, since 1932, the Duke company has consistently reduced rates.

It was the second reduction by the company in 1936 and the savings to consumers within the past four years through rate reductions have totalled almost \$5,000,000.

Complete schedule of the new rates will be found in this issue of The Times, on page two.

Marine Strike Spreads To All Major Ports

One of the worst maritime strikes in history spread to every major port in the country Tuesday, affecting 278 ships and 90,000 men. Economic losses ran into millions and additional thousands of workers in allied industries were threatened with unemployment should the walkout continue.

The spotlight shifted to the east coast as the Pacific coast strike reached an impasse. Police prepared for violence on all fronts as the International Seamen's union announced in New York it would hire strike-breakers and Pacific shipowners said they would put skeleton crews on vessels.

Fighting broke out in New Orleans. Union officials declared a "war to the finish" in New York. Strikers prepared to use force in various ports to prevent strike-bound ships from sailing. Arrests occurred in Philadelphia and Savannah. Longshoremen began joining the east coast strike originally called in sympathy for the west coast men. Eight thousand lumbermen in the northwest were thrown out of work when mills closed. Engineers and shipbuilders promised to support the movement.

The seamen's defense committee said 144 ships and 15,000 men were affected on the east and gulf coasts, and Pacific figures showed 134 ships and 75,000 men involved.

COLLEGE ATHLETIC FIELD WORK STARTS

WPA Forces Will Build Recreation Project For Use By This Community

Work was started Monday morning on the Brevard College athletic field, with the Works Progress Administration to have charge of the construction work, in conjunction with the town of Brevard, sponsor of the project, and the cooperation of the college.

Plans call for section of a stone wall along North Broad street and French Broad street, with other improvements to be made by the WPA which will make the athletic field not only a thing of beauty, but one of service to the college and the community.

Part of the materials and all of the labor will be furnished by the WPA, enabling the field to be of more elaborate and appropriate type for use by the college and the community as a recreation center.

The four acres of land on which the field, and later the gymnasium will be constructed, has been deeded over to the Town of Brevard, and will be under control when finished of a board of control composed of members of the college faculty and officials of the town. Cost of operating the project when developed will be borne by the college.

Superphosphating Of Land Pays In Yields

(W. C. Mancaas, Assistant Agent.)

According to field tests of soils in this county and Henderson county made by Mr. Lee, soil specialist from State College, lime is a limiting factor in the results obtained from the use of triple superphosphate.

The triple superphosphate furnished by the Tennessee Valley Authority for farm management demonstration work in the county has given excellent results in the yield and in the quality of crops in most cases except those where the soil shows a decided acid reaction according to actual tests. Results have been measured as in terms of tons of hay and estimated in yield of small grains which are almost unbelievable in some cases.

The weights of hay vary from 1610 pounds per acre on phosphated areas to 200 pounds per acre on the check-plot or non-phosphated areas. The yield on wheat on one field with proper lime content was estimated to be 22 bushels per acre where the triple superphosphate was applied and only 12 bushels per acre on the check-plot, or land not receiving triple superphosphate.

According to these results we can easily see that available phosphate in the soil is an important factor and that the lime content must be sufficient for the greatest return from triple superphosphate.

There is always something akin to wonderment when one opens a telegram, the idea having been imbedded in most people that a telegram is of vital importance.

Surprise of all times in The Transylvania Times office came Wednesday afternoon just before the paper went to press when a telegram was delivered by the Western Union boy, reading as follows:

EDITOR THE TIMES

TEXAS COMPANY SUMTER

BROADUS HENDERSON
Broadus has been working in Greenville for a couple of years, and of course has been keeping up with his home county through the Home Paper.
