Safety Parade Will Be Held Here Friday of Next Week

Arrangements have been made for a mammoth Safety Parade in Brevard on Friday, August 20, at 8 o'clock, which is expected to attract thousands of people here from all parts of the county.

Mayor A. H. Harris has issued a proclamation setting aside this day as Safety Day, and the State Highway patrol, city officials, police and departments, civic and fraternal groups as well as merchants are expected to enter into the spirit of Safety Day by putting truck or floats in the parade.

The feature of the Safety Day Parade will be a driverless car, to be piloted by remote control, by Capt. J. J. Lynch, well known safety crusader, who has thrilled thousands in nearby cities, with his magic car. Captain Lynch will drive the magic car from a control car that follows about 50 feet behind, by remote control. The driverless car will pass through our business section in the Safety Parade, observe all traffic laws, making right and left hand and U-turns and blows its horn when necessary for safety.

At the close of the parade Capt. Lynch will lecture on Safety Driving on the Highways, from the City Hall. Walter Y. Hosier, safety engineer was here this week making plans for the parade. A large number of cars and trucks with special safety banners are expected to be in the parade. The banners will be furnished free to all participants in the parade. Lessons in safety driving and rules of traffic will be stressed.

The parade will form on West Main street beyond the city hall, proceed east on Main street to Broad, thence to the corner of Broad and Jordan, thence east to Gaston, north to Main and west across the square to the city hall, where Capt. Lynch will deliver a short lecture on safety.

Motorcycle patrolmen for the state highway department, Brevard Boy Scouts, the Brevard fire department, city and county officials and business concerns will enter the parade.

The Safety Parade is sponsored by the safety division of the state highway department, and has been put on in practically all the larger cities of the state, and many of the smaller. During the coming week the parade will be staged in Hendersonville, Waynesville, Brevard, and Sylva.

Complete announcement as to order of the parade and other data will be carried in next week's Times.

TYPHOID CLINICS TO CONTINUE IN COUNTY

Free Vaccine Offered Children By Transylvania Health Unit

Dr. W. H. Windley, Transylvania health officer, reports that very good interest was shown in the typhoid and diphtheria clinics which were started Monday of this week, but that the number did not, in his opinion, come near up to those children who should have the treatments.

No charge is made for the typhoid vaccination, and a minimum charge of 15 cents is made for diphtheria vaccine for each child.

The schedule will be continued for three weeks, Dr. Windley announces, but it will be necessary that those who wish immunization against typhoid start taking the treatment next week.

Lake Toxaway had a good representation, with 62 being present, 18 of whom took the diphtheria vaccine. Other sections responded very well. Dr. Windley reported Wednesday, but he requested The Times to urge parents to send their children to the free clinics which will not be repeated after completion this month. Rosenwald school was well represented, with 116 responding, 32 of whom took the diphtheria vaccine.

In the interest of the safety of the citizens of Brevard and Transylvania County, while traveling or walking on our city streets, or on the highways; as a memorial to those who have met a violent death, caused by the wheels of traffic, with a feeling of remorse to those who have been crippled for life by the same causes, and as a tribute of thanks to those who are respecting the rights and lives of others, by driving and walking safely, and as a plea to every human being in our city, county and state to do his part in making the streets and highways of North Carolina safe for everybody;

I, A. H. Harris, Mayor of the Town of Brevard, do hereby proclaim Friday, August 20th, as Safety Day for the Town of Brevard, and call upon every citizen, business firm, institution, and organization to lend every possible cooperation in making Safety Day and our Safety Parade a success, that will be long remembered, and I further request that our neighbors join with us in making Safety Day a big event in this community.

BRICK STRUCTURE WILL HAVE EIGHT ROOMS, BASEMENT

WFA and County Cooperating On Needed Plant For Elementary Grades

Work was started last Thursday on the new Brevard elementary school building which will be a modern edifice in every respect, and will adequately care for the elementary work here for a number of years to come. The Works Progress Administration is doing the work and furnishing large part of the materials.

The structure will be of brick and tile with a metal roof, and the 8 rooms will all be on one ground floor, which is the new approved type for elementary school buildings.

Total cost of the building is estimated at \$23,000, with the WPA furnishing around 70 per cent of the cost. Realizing that a new building would have to be constructed the school officials have been laying aside funds for the work for the past two years, and County Superintendent J. B. Jones announces that sufficient cash is on hand to take care of the sponsor's part of the cost of the building.

In addition to the six class rooms for grades one through three, a large basement will be built, in which the steam heating plant will be housed, and provision made for a modern lunch room to be used by both elementary and grammar school children.

Twenty men are employed on the project, with A. M. Case as supervisor and superintendent of construction. It is expected that the building will be completed and ready for use by February or March.

Provision was made last year to care for the elementary grades in the primary building. While the accommodations were far from satisfactory they were the best that could be made under the circumstances, and the county was unable to build without aid of the WPA. Superintendent Jones said that Director W. E. Breese had given him every cooperation in starting the work, and had promised to lend his aid in rushing the building to completion as rapidly as labor conditions under the WPA setup would permit.
