

**PAPER PLANT WILL LOCATE IN COUNTY**

(Continued from First Page)

completed will be the most modern and up-to-date cigarette paper plant anywhere. The estimated investment is about \$2,000,000. The necessary funds have all been provided privately and there will be no offering of securities of any kind.

Associated in the Ecusta Paper Corporation are interests connected with Papereries Rene Billore of Odet and Cascade, France, and Papereries De Champagne of Troyes, France. Both these companies are leaders in their field, have been manufacturing cigarette papers for over a hundred years and their products are well known and largely used in this country.

Through this combination, Ecusta Paper Corporation, has at its disposal not only the well established formulae of French cigarette paper as used for many years by the old established Champagne and Billore mills, but in addition will be benefited by the experienced aid of French technicians of the highest standing and will be in a position to add American ingenuity skill and production methods to the experience of French cigarette paper manufacturers. As a result of this combination of talent and experience, the usual period of trial and error will be avoided, and the new plant will be able, from the beginning to duplicate the type character of excellent French cigarette paper which has become so well established and popular in this country. When the mill is in operation it will give steady employment to between 300 and 400 persons who will be employed locally and will be trained in the technical details of this high type of paper.

There are no substantial seasonal variations in either the production or demand for cigarette paper and once in operation it is expected that the plant will run continuously.

The deal has been handled in this section by Walter M. Schwarz, New York attorney and vice president of the Ecusta Paper corporation, for the company; by George H. Wright, Asheville attorney for the guaranty title company, with J. E. Sirrine & Company of Greenville, S. C., as locating engineers. Harry H. Patton and C. M. Douglas of Brevard have handled details in this community, with Ralph H. Ramsey, Jr., as attorney.

Approximately 225 acres of ideally located land in the Davidson River-French Broad river valley has been secured by the Ecusta corporation for its plant site.

The plant site proper lies between the Pisgah Forest postoffice which is located on Highway 64, two miles north of Brevard, and the Memorial Arch entrance to Pisgah National Forest on N. C. 280 which is approximately two and one-half miles north of Brevard.

A hard surfaced highway, known as the Vanderbilt road, connects the two highways, and passes the property of the new company, making a boundary line on the west for the most of the width of the property.

The Southern Railway's Lake Toxaway line of the Asheville division is within one-quarter mile of the plant site, with the Pisgah Forest station and

telegraph office located about one-half mile southeast of the plant.

The plant site property is located on what was at one time the Deaver lands, with the main tract having been purchased from Capt. W. McK (Bill) Fetzer, owner and operator of Camp Sapphire, this section's oldest organized summer camp for boys. The camp is located two miles west of the plant.

Adjoining property was secured from John C. and R. R. Deaver, U. G. Reeves, with railroad rights of ways having been secured from the Carr Lumber company and W. D. Deaver and wife.

On the eastern boundary of the company's property, the Davidson River forms a natural line, with the river proper in fee having been secured from all property owners on the east bank of the Davidson River, making the new company complete owners of the river and all approaches thereto on the eastern as well as the western bank.

Pisgah National Forest borders the company's lands on the northwest side, and the water to be used in the new plant flows out of the forest on the company owned lands until, it has passed the plant of the new concern.

With mountains practically surrounding the valley, the plant is situated in what might be termed a complete covey in all of its own. Massive hills rise in either direction from the plant, a few miles to a few hundreds yards in distance, and the land itself is practically level, with a gentle sloping which insures natural drainage and healthful surroundings.

A fine bed of gravel was found by engineers just under the surface of the fine alluvial Toxaway loam soil, on which the plant is to be built, guaranteeing a fine foundation for the tremendous sized structure.

The plant site has long been viewed by local residents, and many a prayer has been offered that some day a concern of the type that is to build here would locate a plant on this most ideally located property.

**A TRIBUTE TO MOTHER**

"Out in life's garden, where sympathy grew,  
God planted a soul, 'twas the soul of you.

Life's wonderful garden, love, seeking, went through  
Till he found a heart... 'twas the heart of you.

I have sought through life's garden of roses and rue,  
And I find sweet blossoms, all jeweled with dew.

Love, sympathy, faith... all unchanging and true,  
Are the heart of my flower... dearest Mother, 'tis you."

We who wear the white rose on Mother's Day can only have a mother's spirit and our memories of her with us on this day. But you who are privileged to still have her with you, will you let us say to you from the bottom of our heart—take good care of her, love her, appreciate her and live as she would have you live, Don't say and do things that will hurt her deeply. You never know how much that name Mother means until she is taken to "Eternity's Garden of Roses."

**Former Brevard Man Drowned When Small Boat Turns In Lake**

Ralph Hyder, 38 year old detective of Asheville, was drowned in Lake Summit near Hendersonville Sunday night when a small boat he and three other companions were riding in capsized. The three companions escaped by holding to the overturned boat.

Mr. Hyder was well known in Brevard where he was in business as an electrical contractor for several years during 1926 to 1930 period and had a wide circle of friends here.

The body of Hyder was recovered Sunday night about 10:30 o'clock by rescue workers with a drag line and hooks. The drowning occurred near the north shore of Lake Summit about 300 yards from the Greenville highway.

Companions of Mr. Hyder stated that he tried to swim to the shore while the other three held to the boat and that he went down about twenty-five feet before reaching the shore. It was his intention, his companions said, to swim to shore and go for aid.

Mr. Hyder was a member of the Buncombe county rural police force for several years after leaving Brevard, but left the department four years ago to organize a private detective agency.
