## College Baseballers Take Blue Ridge On With One-Sided Win

(John Rogers)  
The Brevard College Tornado went on a rampage here Tuesday afternoon to swamp the Blue Ridge School for Boys 17-1.

The Blue Ridgeans seemed to have had little practice and as a result played a ragged game of ball. Shuford, hurler for Blue Ridge got off to a good start but soon became wild and was replaced by a relief hurler. Blue Ridge's lone tally came in the fifth inning when Crenecki got a circuit hit with one on base.

Hoyle, Brevard moundman did a fine job of pitching allowing only four hits while he and his fellow men touched the Blue Ridgean for eight safeties. The Tornado committed only one error to Blue Ridge's eight.

The Tornado will play Textile College here next Tuesday afternoon at 2:30 and Blue Ridge again the following Saturday, with a probable game with WCTC here Friday the 19th.

"I have withdrawn from the race as candidate for Register of Deeds of Transylvania County. The old Adage goes, 'The more the merrier but the fewer the better share.' So I am leaving it up to the boys with the command—CHARGE. I want to thank the good people of the county who had pledged themselves to support me in the coming election, and also the ones I did not see who were going to do so. Here's hoping that the election will soon be 'Gone With The Wind,' and all the offices to be filled in the Fall will be by honorable law abiding citizens."

Respectfully,  
J. W. Glazener.

## Commercial Soybeans Are Seen By Expert

Grow soybeans as a commercial crop, for soil improvement or as a feed crop, Prof. C. B. Williams, head of the State College Agronomy Department, advises North Carolina farmers. He urges commercial growers to increase yields per acre this year in view of the demand for this crop and its products due to the war situation in Europe and the Orient.

Recommending the yellow-seeded varieties, which are in greatest demand by oil millers, Prof. Williams said that Herman and Haberlandt are adapted to the Mountain area.

"The land selected for soybeans should be of at least average productivity," the agronomist declared. "It should be well drained and in proper shape for planting on or about May 1. Although soybeans belong to the legume family, they require moderate amounts of a properly-selected fertilizer."

"Ordinarily," Prof. Williams continued, "little or no nitrogen is needed in the fertilizer mixture if the soil is in a fairly good state of productivity. However, if the soil is poor to medium in fertility, about 2 percent nitrogen should be included in the mixtures."

The fertilizer recommendations of the College Agronomy Department for soybeans are: Piedmont and Mountains, 200 to 300 pounds of a 2-10-4 or 2-10-6 on fairly productive soils, and 250 to 300 pounds of a 2-10-5 or 200 pounds of a 3-15-6 on poor to medium soils.

## Pisgah Trout Fishing Streams Be Open To Public This Week-End

John B. Fortin, District Forest Ranger of the district, announces that three well-stocked trout streams will be opened this week-end.

The first stream to be opened will be all tributaries of the Pigeon River on the Sherwood Cooperative Area, with the exception of Big East Fork. Some of the tributaries of this stream have not been open in two years. Pigeon River has been stocked this year with 2,750 legal size brook trout and last fall received 3,000 legal size trout, this should insure excellent fishing for all. As this area is open under cooperative agreement bait fishing is permitted; however, certain areas have been excluded for fly fishing.

On Saturday, April 20th, the North Fork of the French Broad River on the Pisgah National Game Preserve will be opened for the first time in two years. This stream has been stocked with 2,000 rainbow trout this spring. Only artificial lure is permitted on this stream. The checking station is easily reached by driving up French Broad River from Rosman to Gloucester. The checking station will be located at the intersection of the Courthouse and Tennessee Said Roads. Preserve regulations have been changed this year to permit the taking of 12 legal size fish per day. Children under 12 years of age need no permit when accompanied by permit holders.

On Sunday, April 21st, the Upper South Mills River will be opened for fishing on the Pisgah National Game Preserve. South Mills River will be open from the Pink Beds to Wolf Ford and to the intake on Bradley Creek, this includes the tributaries of Poplar Creek, Thompson Creek, Pilot Cove and Slate Rock. The checking station for this area will be located at the intersection of highway No. 284 and the Yellow Gap road in the Pink Beds. Regulations for this stream are the same as for other streams in the National Game Preserve.

Permits for both the Sherwood Cooperative Area and the Pisgah National Game Preserve may be obtained at the checking station and these streams will not be limited as to number of fishermen. Fishing permits for the Game Preserve may be obtained at the Ranger Station at Pisgah Forest or at the Supervisor's Office, in Asheville. Permits are \$1.00 per person per day, regardless of age or sex, except that 12 years of age need no permit when accompanied by permit holders. All fishermen will be required to check in at the designated checking station and must check out, with their catch, at this same station. Fishing will be permitted from 5:00 a. m. to 8:00 p. m. only. Brook trout under six inches and brown and rainbow trout under eight inches must be returned to water immediately. No fish taken under permit may be sold or disposed of for commercial purposes. No permittee may be allowed more than 10 days fishing per season.
