## Community Hospital Funds Needed

People who have made pledges to the Community Hospital Building fund payable June 1, are reminded that the date has arrived, and pledges are needed to make the job complete.

Decision was made soon after the movement was started that the actual building would be started as soon as—and not before—the actual cash was on hand, and many of the people who subscribed to the fund made their pledges due as of June 1st.

made either contributions or pledges, the committee in charge points out, and these people are requested to do so at once.

Cash donations may be left at The Times office, county superintendent's office, Building & Loan office, or George W. Wheeler. If a solicitor is wanted, leave word at either of the above offices, and official of the committee will call.

The hospital must be started at once, and while the major portion is on hand in cash, there is plenty of room left for all to make contributions.

AT THE HELM—in time of need

Donations to the American Red Cross war relief fund continue to come in without solicitation, and the roll call chairman asks that any who wish to make contribution to the war relief fund leave their cash at the Building & Loan office or The Times office.

Pressing need is emphasized in a bulletin sent out from national headquarters. Official notification to Chairman J. S. Silverstein is to the effect that sickness and death is following in the wake of the German army which is pressing hard to reach Paris, and that thousands of French children and aged have no homes, no food, no medicine, and literally nowhere to turn—except to the Red Cross.

Belgium and the Netherlands have been completely over-run by the German army, the official bulletin states, and devastation of its worst sort is being left in the wake of the mechanized army which is commanded by Hitler to take France and England, and disregard the cost in property or human life.

Radio reports Wednesday afternoon were to the effect that hand-to-hand fighting was going on along the Somme-Aisne front. Two million men were reported to be battling for possession of the new battle lines.

The British reported Tuesday that practically half million troops had been safely evacuated from Flanders, but at terrific loss in men and munitions. The Red Cross bulletin arriving Wednesday afternoon from national headquarters urged that additional donations be made to care for the people who had their all destroyed in that section of France.

## Parking Regulations Discussed By Board At Monday's Meeting

One hour parking in the business section of Brevard was discussed at length by the board of aldermen in meeting Monday night.

Uptown traffic congestion during daytime is giving the officers a hard nut to crack daily, it was pointed out at the meeting and only visible relief for the problem is to permit cars to park only one hour at a time in the immediate four blocks around the square.

Definite action will be taken on the matter at a called meeting of the board to be held next week.

Delinquent tax collections were ordered started at once, and if necessary, garnishee and levy tactics will be resorted to, the board decided. Extra expenses incurred during the fiscal year caused by the freezing of water lines, and damage to streets, practically drained the town treasury of surplus funds, and the pushing of collections is the only remedy, the board decided.

Bruce Drysdale says the expansion program has been under way gradually all this year. A new type of down-draft kiln is being built. This is unlike any of the kilns in operation at the plant.

The capacity of the brick drying department has been increased and so has that of the grinding plant.

The plant has had good business for the past year and this expansion is provided so as to take care of a heavier load when production needs to be stepped up.
