HAIR DOOS

Most people are bothered with dandruff, and are always trying new remedies to get rid of it. Here are a few you can try. Cleanliness is the first essential. Dandruff is due to a micro-organism which attacks the scalp, resulting in a dry powdery scale that causes the scalp to itch.

One successful way to treat this condition is to select carefully a scalp ointment. Part the hair in sections and apply this ointment to the scalp in generous amounts. Massage the ointment thoroughly into the scalp and leave it on overnight. The next morning give the hair a good shampoo of herbal or oil base, according to the condition of the scalp, whether oily or dry. Use plenty of clear hot water in the rinse. This treatment is more successful if the ointment is applied every night for ten nights, and shampooed on the first, third, sixth and ninth days. Dry your hair by hand, preferably with linen towels.

The raw egg method has also proven successful by many users. Take one egg and beat yolk and white well together. Brush the hair thoroughly and apply the egg, dividing the hair in sections to reach all parts of the scalp. Then shampoo with your favorite shampoo. Be careful to use lukewarm water at first, otherwise you might cook the egg in your hair. Repeat this treatment four times every ten days.

Your physical condition is reflected by your hair. If you want healthful, beautiful hair (and who doesn't?), avoid all possible illness, even slight colds, which tend to make the hair dull and lifeless.
