FARM EQUIPMENT ITEMS RELEASED FROM QUOTA LIST

Complete List Is Given. Action Taken To Put Equipment To Work

In an effort to move all available equipment into active production as quickly as possible, several items of farm machinery and equipment have been released from county quotas and will be rationed only on a state basis, it was announced today by T. J. Wilson, Chairman of the county USDA War Board.

The release of this equipment was provided in an amendment to Food Production Order 3, which authorized the State USDA War Board to release items on which there now is an equitable distribution between counties, the chairman said.

The items released by the State War Board include: tractor-drawn or mounted moldboard plows, tractor-drawn or mounted disc plows, one-way tillers, transplanters, garden tractors, soil pulverizers and packers, rotary hoes, spring tooth harrows, power take-off tractor mowers, power sprayers, traction sprayers, spray pumps (power), power dusters, traction dusters, hammer mills and burr mills.

He said county farm machinery rationing committees may issue purchase certificates for these items and dealers may honor the certificates regardless of county designations and regardless of county quotas. Applicants for purchase certificates will be required, however, to certify that they have located the equipment for sale in hands of a dealer.
