Bob Eason, of Savannah, Ga., formerly of Brevard, has enlisted in the naval air corps and is now stationed at Barin Field, Pensacola, Fla. He was a popular member of the 1943 graduating class of Brevard high school. After moving from Brevard to Savannah with his parents, he volunteered soon afterwards in the armed forces.

Cpl. Vaughn Lane, who is in the infantry of the U. S. army, stationed now overseas somewhere in North Africa, writes, in a letter to The Times, that he is getting on fine, but wishes he had some of Brevard's cool climate over where he is. He wrote further, "I noticed that the people of Transylvania were the highest in the bond drive for this state. That sure does make a guy feel like going on to Berlin, and we will. All the people speak French here and it's hard to get around if you can't speak a few words. Tell all the folks hello for me. We have a big job to do here."

O. W. Glazener, pharmacist mate in the medical department of the U. S. navy, is in overseas duty. In a letter to the editor of this paper, he writes that he surely enjoys the "good old home paper" even though it is sometimes as late as two months in reaching him. He is the son of Mr. Will Glazener, of the Calvert section.

Sgt. Ed Singletary has been overseas for the past six months and has made a fine record. He is at home on leave, and is now sick at the Base hospital at Greenville. His many friends wish for him a speedy recovery.

In a letter to his aunt, Miss Annie Gash, Ensign S. M. Gash who is now located in North Africa, stated that the "climate where we are now reminds me a good deal of Brevard. year directors, Carl Hardin and George Massey. This group, which was nominated at the prior meeting by a committee headed by B. W. Thomason, will be inducted at the next meeting of the club.

After the voting had ended, President McMahan said he felt that wise choices had been made, and he commended the interest shown in and his fidelity to the club by the president-elect since its organization, of which he is a charter member. Mr. McMahan expressed his appreciation of the backing given him during his tenure of office and promised to give a resume of the year's activities at the next meeting of the club.

There was some discussion of providing rooms for deserving soldiers on furlough who might be stranded in Brevard and Lion Frank Kerber, chairman of the war activities committee, was directed to canvass the matter with representatives of other local clubs in order to learn their attitude toward the proposal.

It was voted by the club to meet at 7:30 instead of 7:00 o'clock in the hope that the change would boost attendance.

President McMahan expressed hope that a good delegation of local Lions would attend the state convention to be held in Winston-Salem June 27 and 28.

the month to give full consideration to the budget.

In most cases, the department proposals called for increases in expenditures. The commissioners said that every effort would be made to shave operating costs so that there would be little or no increase in the tax rate for next year.

Lon Chapman, constable of Cathey's Creek township, filed his official bond of \$1000 with the board. Mrs. Oliver Orr and Mrs. H. R. Bobst appeared before the board in the interest of establishing a county library.

Watson Banks was issued wine and beer licenses for his place at Pisgah Forest.

SUNLIGHT WILL DESTROY ALL OF VITAMINS IN MILK

Officials Stress Importance Of Storage In A Cool, Dark Place

Sunlight destroys the riboflavin or Vitamin B2 of milk and therefore this valuable food, which is such an important part of the everyday diet, should be stored in a cool, dark place, say W. J. Patterson and F. M. Haig of the Animal Industry department at N. C. State college.

They report that recent studies at the North Carolina Experiment Station show that the riboflavin is rapidly destroyed when milk is exposed to sunlight in standard bottles under normal conditions. The tests showed that 44 percent of this valuable vitamin was lost in one hour's time and that only 28 percent of the riboflavin remained after the milk had been exposed to sunlight for three hours.

The scientists report that milk and meat are two of the most important sources of the vitamin in the human diet, although it is also found in green leafy vegetables, the whole cereal grains, liver, eggs and yeast. Practically none of the vitamin is found in such foods as butter, fats of all kinds, unenriched flour and white potatoes.

The importance of riboflavin in the daily diet and the results of these tests, showing that the vitamin is rapidly lost when milk is exposed to sunlight, suggest that handlers of milk and housewives should cooperate in the proper storage of milk so that its full value may be maintained.
