the entire staff at the college is busy getting out large quantities of literature that is being sent all over eastern America, as well as the south.

"The average person's educational career has been upset by the war and the consequent lowering of the draft age to 18 years," Dr. Coltrane stated.

"The officials of Brevard college recognize this confusion and perplexity on the part of parents and students and have projected a plan whereby bewildered young people may prepare themselves for any emergency that may arise.

"Brevard has a unified and integrated program of acceleration, both as to courses and time. This program is effective in that it combines the pre-college courses and the college courses. The courses on the pre-college level are unit courses. They are full-year courses carrying credit for a year's work, but they are arranged so that they can be completed on a semester basis.

"Brevard college operates on a continuous basis. There are two semesters of 17 weeks each, the first beginning in September and the second in February. There is also a summer term of fifteen weeks. This makes possible the completion of four years of work in three years.

"Thus it is easy to see that such a program has real advantages. Selective service does not permit a young man of 18 much freedom in his choice of an educational career. A young person with 8 units of high school credit, 15 or 16 years of age, has the opportunity of completing high school and junior college by the time he reaches the 18th birthday.

Gas Coupons Must Be Endorsed In Ink

Users of gasoline, beginning July 22, will be liable to lose their gasoline rations if each coupon in their possession is not properly endorsed in ink.

The new policy on coupon endorsements, the chairman said, was taken to assure maximum protection to book holders. Henceforth, motorists will be required to endorse all coupons immediately upon receipt of renewal gasoline rations, so that they will never have unendorsed coupons in their possession.

Endorsement consists of writing—in ink—on the face of each ration coupon, the license number of the vehicle for which the ration was issued and the state in which the car is registered.
