

Gives Explanation Of Granulated Honey And What To Do About It

Granulated Honey Can Be Converted Easily And Used That Way

By J. W. Dickson

During the months where there is considerable honey on the market, many people become confused about granulated honey, or rather honey that might become granulated, and conceive the idea that granulated honey is honey (so called) obtained by feeding Cane or Beet Sugar syrup (made by mixing equal parts of one or both of these sugars with water.)

This syrup is never fed to honey bees only in the early spring following a poor honey season the year before to tide them over to the early flowers, and none of this syrup ever reaches the surplus honey for after it has been used by the bees in brood-rearing, a strong colony will use several times that amount of fresh nectar from the early flowers after the sugar has been consumed before the main flow starts. We could give other reasons, but consider it unnecessary as the following will probably clear up any far-fetched ideas, notions, theories, or what have you regarding granulated honey.

Honey is composed of Levulose and Dextrose, usually in about equal portions. Levulose is one of the groups of fruit sugars that rotates the plane of polarization of a ray of light to the right. Dextrose likewise is one of the groups of fruit sugar that rotates the plane of polarization of a ray of light to the left. This composition of honey remains the same north, south, east and west.

In the south and east where the rainfall is from 60 to 80 inches, the moisture content of honey is proportionately high except in a very dry fall. The moisture content in fall Astor honey (commonly known as Frostweed) is low. In this case Astor honey will sometimes granulate to some extent, but this only happens in this section about one year in ten.

On the other hand in the north western states where the seasons are normally dry before and during the honey flow, (June 1st to July 15, with the mercury around 110 to 20) the water content in the nectar is relatively low, therefore, the Levulose and Dextrose become slightly out of balance

GLANCING BACK AT BREVARD

Taken from the files of The Sylvan Valley News, beginning 1895

(From the file of June 1906)

Marriage license has been issued to Prof. C. R. Sharpe and Miss Allie Mull, of the Selica section. Mr. Sharpe was the popular teacher at Rocky Hill last winter, and the couple will have the congratulations of a wide circle of friends. The wedding ceremony was pronounced by Rev. R. G. Tuttle on Wednesday last.

A "stinging" calamity occurred last Tuesday when Mrs. Goodson staked her cow near enough to a hive of bees to attract the resentment of these busy workers and they attacked the cow. Mrs. Goodson ran to unloose the cow just as she had succeeded, in her efforts to get away, in upsetting the hive. The bees then included Mrs. Goodson in their resentment, and her frenzied calls for help brought all the neighbors to her assistance—many of whom received special attention from the bees. There were a lot of swollen faces, some of which, by the assistance of Dr. Wallis, wore quite attractive patches of powdered soda. It evidently doesn't pay to farm and keep stock and bees on a town lot.

A New York syndicate recently purchased the Asheville and Craggy Mountain railway and they are considering the advisability of rebuilding the road to the old Overlook park on Sunset mountain and have another amusement park. If this plan is put into effect, it will be a big drawing card in the way of amusement for the visitors to the city, as the park has always been very popular with the visitors to the city, it affording a beautiful view of the surrounding country and was very desirable for picnic parties and other recreation.

Rev. F. M. Jordan and wife, in a letter to the editor, express their sincere thanks to the brethren and friends in Brevard for the present of a nice new buggy and harness. Since the gift arrived on his 76th birthday, the couple regarded it as a fine birthday present.

A representative of the News had quite a conversation with Thomas A. Edison on Monday last, while the noted inventor was in Brevard for a brief visit, and he

and the honey will readily granulate especially if churned up in an extractor as most of it is handled. The writer has seen western honey granulated to almost the consistency of our light brown sugar, and this honey is produced from white and yellow sweet clover, alsike clover and dwarf and mammoth white clover, and certainly does not contain any cane sugar.

In conclusion should you happen to get some granulated honey from some source, just pour some in a boiler, place this boiled in a vessel and put in water in vessel to come about half-way up on honey container and heat water and the honey will soon liquify again and will stay that way for quite awhile, perhaps until it is used up. By no means place the honey container next to hot stove as honey is easily scorched.

Nabbed As Spy

ERNEST F. LEHMITZ, picked up by the F.B.I. in New York City, is accused of sending valuable military information on convoys and troop movements to Germany in seemingly innocuous letters. His notes admitted he was stumped on the invasion. (International)

expressed himself as greatly pleased with this particular section of the country. Mr. Edison was traveling in a party of four with two large automobiles, and has been all over the state nearly. He came by automobile from New York City. Although the roads were very muddy, he found no difficulty in traveling, and went from here to Lake Toxaway. In speaking of Brevard, Mr. Edison was greatly surprised that a town with so few inhabitants should have the many conveniences that we have—such as water, sewers and electric lights. He said that the valley of the French Broad from Penrose up to Brevard was as beautiful and fertile looking valley as he had ever seen, and he thought we had a most ideal country, as to scenery, climate and farming prospects.

H. P. Clarke and family have left their Aethelwold hotel and gone to their beautiful home, Rockbrook Farm, for the summer.

Miss Nina Garren, daughter of Mr. and Mrs. Robert Garren, and J. Waddy Tinsley were married on Sunday last, the Rev. J. M. Hamlin, officiating.

We learn that Mint Barton, of Selica, and Miss Nellie Allison were married at Blantyre Sunday last. Rev. T. C. Holtzclaw pronounced the ceremony.

Navajo National Monument Arizona, had 513 visitors in 1940.

PRESS ASS'N. MET IN ASHEVILLE SAT.

Enthusiastically Endorse New State And National Advertising Plan

Ira B. Armfield, Henry R. Henderson and Fred Taylor, of The Times organization and Mrs. Mary Osborne Paxton, attended a regular meeting of the W.N.C. Press association at the S&W Cafeteria in Asheville last Saturday evening.

Mr. Armfield, in the absence of Ed M. Anderson, led a discussion of the National Advertising Service and its affiliate in this state, the North Carolina Advertising Service. The major objective of these two organizations, which were originated and are conducted entirely by publishers, is to sell non-daily newspapers to national advertisers and at the same time to elevate the standards of such newspapers to the end that they will become better advertising media. The dozen or more publishers gathered in Asheville, after all aspects of the enterprise had been discussed, voiced their unqualified approval of the undertaking, the first of its kind. Several have already signed contracts with the services and others present indicated their intention of doing so forthwith.

Dr. Roy Parker, of the journalism department at Chapel Hill, is director of the N.C.A.S. by designation of the state press association, which endorsed the NAS and voted to have the state organization work in concert with it at the recent convention in Winston-Salem.

Ed M. Anderson is one of the organizers of the N.C.A.S. and is a director of the national organization.

CEMETERY CLEANING

All persons who have relatives or friends buried in Mt. Moriah Calvert cemetery are requested to meet this Saturday morning at 8 o'clock, and bring suitable tools. announcement has been made by J. W. Glazener.

MUGGS AND SKEETER

LET ME IN, SKEETER!

OH!! IS THAT YOU, MUGGS? SAY, WILL YA GET ME MY MODEL AIR PLANES?

WHAT'S GETTING INTO YOU? I WANT TO GET IN THERE AND TAKE A BATH!!

BESIDES, YOUR AIRPLANES ARE NO GOOD TO YOU IN THE BATH-TUB!!

THAT'S WHAT YOU KNOW ABOUT MILITARY STRATEGY!!

...I'M ENGAGED IN SOME COMBINED OPERATIONS AND I CAN'T PROCEED WITHOUT AIR SUPPORT!!

May I Serve Your Dinner?

Come in for a point-saving dinner of fine food well cooked. Save time and trouble.
