Who Have Elected to Attend

BREVARD COLLEGE

An Institution Which Enjoys Our Confidence and Deserves Our Pride!

A CHALLENGE TO YOUTH!

In many parts of the world today, the youth of this country are meeting the supreme test of stamina and devotion. They are not only undergoing the ordeal of battle, but they are being subjected to subtle influences that would corrupt their thinking and lessen their devotion to American ideals. When peace comes again, the youth of our land, both as individuals and collectively, will face momentous decisions. The things they fought for will have to be made secure. Young men and women who are continuing their schooling are equipping themselves to take an intelligent part in shaping the future course of America.

One of the outstanding assets here which extends its influence over a large area is Brevard college, a fine junior college operated by the Methodist denomination, which offers exceptional educational opportunities to young men and women whose financial resources are limited but who are resolved to equip themselves for useful careers in life.

The students work, earn and learn all at the same time under wise direction. A well-rounded program of instruction is offered in a soundly Christian atmosphere.

This industry is vitally interested in education and in training young people to maintain American ideals and at the same time acquire culture and skills that will make of them more worthy citizens.

The world of tomorrow depends on the youth of today. "Tell me what the youth of today are thinking", said Goethe, "and I will tell you the future of the state." Therefore, a heavy responsibility rests upon our schools and colleges—a responsibility which Brevard college is well equipped to discharge in an efficient manner.
