FARMERS CAN GET TVA FOREST TREE SEEDLINGS TODAY

Applications Are Now Being Taken At Farm Agent's Office Here

Through the cooperation of the forestry department of the TVA and the agricultural extension service, forest tree seedlings will again be available for erosion control planting in Transylvania county for the season 1943-44.

Transylvania county farmers who have eroded land or land too steep for cultivation should place their applications for these seedlings in order that this land will be producing a crop of timber and conserving the soil, both at the same time. This will serve to insure a future supply of wood products in this county—a supply that is being threatened by the heavy war demands on the present forests.

As in the past, applications for TVA trees will be made at the county agent's office. A supply of forms is available in the office, and the county agent or assistant agent will be glad to discuss tree planting with any one interested.

No direct charge is made for the trees; however, the farmer is expected to prepare the soil, plant the trees carefully, and protect them from fire and freezing.

White Pine, Black Locust, and Yellow Poplar are three species that have been planted in this county. They are planted 6 feet apart in rows 7 feet apart which means it takes about 1,000 trees to plant an acre.

An urgent appeal is made for all farmers interested to place their applications early in order to be sure of getting their trees at the desired time.

Farmers can save themselves a lot of headaches by taking definite steps, immediately to market the record 1943 pig crop in an orderly manner, says Food Administrator Jones.

All turkey carvers need: (1) a turkey, (2) a knife and fork, and (3) a handsome Arrow outfit.

For Arrow Shirts will win you lots of admiring glances, even though you don't do a masterful job of carving.

What's more, Arrows will keep those good looks. The shirts are "Sanforized"-labeled, won't shrink even 1%. They have perfect-fitting collars, and pre-pressed fabrics. And Arrow Ties wear well, resist wrinkles.

In short, Arrows are a sensible wartime buy. Why not stop in and see 'em—today.
