County Reaches 75 Percent Of War Fund Quota

DRIVE CONTINUED 10 DAYS LONGER; REPORTS WANTED

Chairman Joseph S. Silversteen Urges Public To Respond Generously.

WILL HOLD SUPPER

A total of approximately \$9,000, or 75 percent of the Transylvania county united war and community chest fund quota of \$12,800, is in sight, Chairman J. S. Silversteen announced today.

The campaign was supposed to have ended today, but since the goal has not been reached, it will be continued for another week or ten days.

"It is of utmost importance that we reach our goal and in order to do that everyone must give all that he or she possibly can," Mr. Silversteen declared.

Of the amount reported to date, approximately \$7,000 is from industries in the county.

C. M. Douglas and Jerry Jerome reported yesterday that they had raised over \$1,200 in the business district and that 51 firms are now on the 100 percent honor roll.

Town block leaders have not reported, but it is believed that when the canvass in the business area and residential sections is completed, the town's quota of \$2,000 will be reached and surpassed.

As yet reports have not been received from the rural communities that have a total quota of \$1,800.

The Brevard high school finished its drive Tuesday and raised approximately \$200, or an average of 50 cents per student. Cash prizes are offered to the school raising the largest amount per pupil.

Mr. Silversteen requests that all reports be turned in as quickly as possible.

Bailey said that since the war started in 1941 that fire losses in the nation have increased 41 percent, and that 75 percent of the losses were preventable.

"We have made a miserable failure in winning the war against

Lunches are provided in this lunch room, as well as in the others of the county, at a cost of 10 cents each.

PATTON FLAYS NEW DEAL & 'MACHINE RULE' IN SPEECH

Republican Candidate For Governor Spoke At Rally Here Monday Night.

Frank Patton, of Morganton and Republican candidate for governor of North Carolina, flayed the new deal and "machine rule" in this state during a speech here Monday night in the courthouse at a county-wide Republican rally.

With ambassadors in Germany, Italy and Japan, he said the Roosevelt administration should have known what was going on in those countries from 1933 until 1941 and that it should have prevented this war.

"Why didn't they tell the people that those nations were arming rapidly so that we could have built up a huge army and navy in America?" he asked. Patton asserted that with all of its vast spending program that unemployment in this country was just as great in 1940 as it was in 1933.

"No, Mr. Roosevelt is not the indispensable man and what we need today is to unshackle business, industry and agriculture," he said. The re-election of Roosevelt, he said, might be a continuation of the war powers given him. He stated that the Democratic party had been taken over by the Communists and labor leaders.

The Morganton attorney declared that the government of North Carolina had been under "machine rule" for 44 years and that local self government had practically vanished in the state. He criticized the public school system and said teachers should be offered incentive pay.

Ralph Fisher, chairman of the county Republican executive committee, presided and introduced local candidates.

Lewis Hamlin Spoke At Republican Rally in Courthouse Monday Night.

Lewis Hamlin, Republican candidate for Congress in his first speech in his home county, delivered at a rally here in the courthouse Monday night, advocated flood control in the French Broad valley by building dams on the headwater streams, dredging and lowering of the river bottom.

"If this is done, our valley will soon become the garden spot of North Carolina and the farm lands of Transylvania, Henderson and Buncombe counties will be greatly enhanced," he said.

He also advocated that the federal government should pay into the county treasuries of the various counties in this district such taxes as would be received from lands that were privately owned before the government took them over.

"The 12th district holds the greatest possibilities for development and furnishing employment after the war of any district in the state," he declared. "We have the climate, labor and natural resources to attract manufacturing enterprises, but one of the great drawbacks is the high tax rate in many of the counties because the federal government has taken much of the land for national forests and the TVA, thus shifting the tax burden on the remaining property owners of the county."

"The TVA is a government corporation and has developed the natural resources of several of
