Farm Questions And Answers

Question: What effect, if any, does the weather have on forage crop diseases?

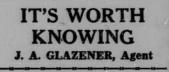

Answer: Weather conditions, especially temperature and moisture, largely determine the destructiveness of forage diseases. They are responsible for a disease being of epidemic proportions one season and of minor consequence the next. Unfortunately, weather conditions in North Carolina favor the development and spread of certain forage diseases the year round. But there are ways to control them.

Question: What are some of the advantages of a home vegetable garden, other than the exercise you get?

Answer: A vegetable garden will save you money. Returns from a garden plot, on an acre-for-acre basis, are higher than for most other crops. A garden will furnish you with higher quality vegetables than is possible to obtain any other way. If the garden is close by, as it should be, you will eat more vegetables, regardless of income. The garden will help provide valuable training for your children, whether in town or on the farm. It provides a hobby, especially for persons doing non-farm work. And excluding the exercise you get, it will provide you with better health. Vegetables are among nature's best foods. They furnish valuable material for building and regulating the body and maintaining health and growth.

Question: What are "robber bees?'

Answer: Bees that swarm over exposed honey, gorge themselves on it and carry it back to their own where bees may get in.

It is reported that we Americans consumed in 1953 an average of about 29 pounds of chicken, 5.3 pounds of turkey, 62 pounds of pork, and 73 pounds of beef.

HD Women Observe Week By Touring Clemson College

One of the highlight observances of National Home Demonstration club week was the annual tour of Trasylvania county women, this past week to Clemson college. The 42 club members who made the trip are pictured above ready to depart on the chartered bus. They are: Mrs. Landrum E. Bagwell, Mrs. E. H. Corpening, Mrs. Queenie Gillespie, Mrs. George Massey, Mrs. Lynch Moore, Mrs. W. P. Laseter, Mrs. John Reed, Miss Judy Laseter, Mrs. Dave White, Mrs. Mark Crosswell, Mrs. D. L. Allison, Mrs. Bob Williams, Mrs. McPherson Wrigley, Mrs. Joseph Jones, Mrs. Hester Merrill, Miss Corrie Jones, Mrs. Tom Garren, Mrs. John Collins, Mrs. David Cooper, Mrs. E. H. Mackey, Mrs. Roy McCall, Mrs. Harvey Sprouse, Mrs. Joe McJunkin, Mrs. Brown Pace, Mrs. Ben Wright, Mrs. W. C. Austin, Mrs. R. L. Cansler, Mrs. Holland Corn, Mrs. H. C. Gardner, Mrs. Louis Pickelsimer, Mrs. Leroy Rackley, Mrs. Jacksie Wolfe, Mrs. Merrill Capps, Mrs. Claude Owen, Mrs. Dan Glazener, Mrs. H. G. Stophel, Mrs. Ben Harkle rood, Mrs. C. F. Allison, Mrs. Sherman Ducker, Mrs. Harry Golderer, Mrs. R. L. Love, and Miss Anne **Benson Priest.**

Price Support Loans Depend On Storage

vantage of government price support loans on this year's harvest should be giving serious considera-

J. A. Glazener, county farm agent for the State College Extension Service, reminds farmers that it is their responsibility to provide storage, either on the farm or in commercial space, before they can ob tain government loans. And even though they do not plan to apply for a loan, inability to find space at the last moment can lead to the necessity for dumping crops on the market at harvest time when prices are often as much as 70 cents below their normal levels for later in the vear.

The question of storage space is particularly important this year, says Mr. Glazener, because national carryovers from last year plus this year's production are expected to result in the greatest total supply of grain and oilseeds we have ever had. This will undoubtedly strain all existing storage facilities, despite the fact that the government has taken steps to expand space through use of the "mothball fleet" to hold stocks owned by the Commodity Credit corporation and building of 100,000,000 bushels additional CCC bin space, as well as through an occupancy guarantee program to encourage building of additional commercial elevators. Current estimates indicate that there may be a shortage of storage space amounting to 150 to 250 million hushels

Information about the type of fa-cilities which would best meet county ASC committee at the post tion to the problem of obtaining their needs can be obtained from office.

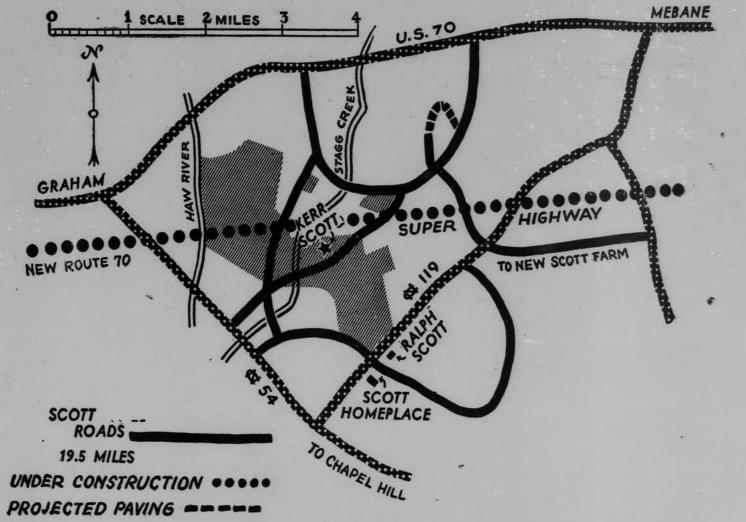

You don't have to feed any milk any more. Here's an easier, cheaper way, used on over 480,000 calves last year: 1. Feed Purina Nursing Chow gruel from 3 days to 30 days old—then quit gruel. Feed no milk.

Common Causes of Dingy Gray Laundry — Dingy gray laundry has been plaguing women for centuries. But the modern housewife now has detergents that go a long way toward eliminating the problem. Graying is caused by three things: 1. Unremoved soil. 2. Redeposited soil. 3. Hard-water soap scum.

The first and third are caused by inefficient washing methods and old-fashioned washing products. The approved new method is this: use plenty of detergent, plenty of hot water and, if things are very soiled, give them two sudsings instead of one.

Redeposited soil is that which has been washed off garments and then, because of lack of detergent or prolonged washing time, is redeposited on the clothes. To avoid this, clothes should be washed in a good detergent. And they should be washed only long enough to get them clean.

Wash clothes that have about the same amount of soil on them together. Do not wash a very badly soiled garment with one that is lightly soiled. Soil from the heavilv soiled garment will be redeposited on the cleaner garment. Redeposited soil makes some clothes look grayer after washing than before

The secret of removing redepos ited soil: many quick, hot washes with plenty of detergent.

North Carolina farmers will plant a record small peanut crop this year - 175,000 acres, or 5 per cent under the 1953 acreage.

In 1953, 38,500 Americans were killed in traffic accidents.

When you think of prescrip tions, think of VARNER'S. - adv. Map of Kerr Scott Plantation (shaded areas) and 19½ Mile Network of Paved Roads.

\$312,500 WURTH OF SECONDARY ROADS

This authentic map shows the new paved roads serving the "model" Kerr Scott plantation and its 17 tenant families, plus some relatives. . . . Dotted line going through 2,800-acre plantation is route of new super highway for which Scott got \$12,658 in right-of-way money. . . . This he used to buy a new 480-acre farm in Orange County and---by golly---he's even got a paved road headed out to his new estate!

LENNON BELIEVES PUBLIC OFFICE IS A PUBLIC TRUST

Have you been wondering why YOUR Community did not get the road it needed. Or why the road you DID GET has gone to pieces so soon?

Maybe if less money had been spent around the Kerr Scott plantation there would have been enough more sent to Transylvania county to build the road you need or to make the one you got a good one.
