Facts Given On Racial Situation Here, State

The current issue of the Fact Sheet of the North Carolina Research Institute gives a complete picture of the racial situation in the state.

According to the statistics given, Transylvania ranks 12th in both the percentage of negro teachers, and negro pupils attending school and the percentage of attendance of both groups of pupils.

The year 1952-'53 was used to make the survey, and Transylvania had a total of 105 white teachers and five negro teachers that year. The exact percentage was 4.5.

White enrollment was set at 3,280 and negro at 179, for a total

of 3,459, and a percentage of 5.2. In school expenditures, the state spends about as much for its whites. Total public school expenditures for the year 1951-'52 was \$139,000,000, of which 26.7 per cent was for negro purposes.

According to the Fact Sheet, this means that 29 per cent of the enrollment (which was the negro enrollment of the state) received 26 per cent of the expenditures.

Insofar as teachers' salaries are concerned, the negro teacher, on the average, receives a larger annual salary in North Carolina than the white teacher and has for several years.

in on something that would make amusing reading. From Jimmy Alderman, Jr., came a new one this week. Jimmy is at the tooth-losing age. One came out last week and he pulled a second loose one the other day. He went up to his mother, showed her the second tooth and asked, "How much is this size?" Naturally he was in hopes that it was a larger tooth than the first one, the 25-cent size.

The United States winter wheat crop, forecast April 1, 1954, at 678 million bushels, is 23 per cent less than the 1953 harvest.
