

**Parris Is Given Honor In Germany**

A-1C Robert E. Parris, son of Mr. and Mrs. Richard Parris, of Brevard, has been named "airman of the month" with the 6910th Security Group of the headquarters section in Germany.

Young Parris was awarded a handsome trophy, a three-day pass and a cash award on being selected "airman of the month" from candidates representing over 600 men. The presentation was made by Colonel Robert H. Augustinus, commander of the 6910th group.

In a letter to his parents, Major Joe E. Roberts, commanding officer of Young Parris, said: "Your son has demonstrated outstanding technical ability . . . His personal appearance makes him an excellent example for other airmen to follow . . . And his pleasant disposition and cheerful attitude toward his duties make him a valuable asset to the squadron and the United States air force."

Following graduation from Brevard high school, Young Parris entered the air force and took his basic training at Lackland air force base in Texas. Prior to going overseas, he was stationed at Brooks air force base.

**Sgt. Morris En Route Home From Korea**

Sgt. Ellis H. Morris, whose wife, Clara, and mother, Mrs. Othia Morris, live in Brevard, is returning to the U. S. after serving with the Eighth army in Korea.

Sergeant Morris was a supply specialist in the 195th Ordnance company. He entered the army during July, 1951, and had served in Korea since February, 1953.

Between the period 1935-39 and 1953 United States farm output increased 31 per cent; per acre production increased 31 per cent, per animal production 24 per cent.

Parris, of Brevard, is shown above in the center receiving a handsome trophy, a three-day pass and a cash prize for being the "airman of the month" of the 6910th security group in Germany. The awards are being made by COLONEL ROBERT H. AUGUSTINUS, right, and Young Parris' commanding officer, MAJOR JOE E. ROBERTS, left, looks on.

**Vagabonds Making Plans For Opening Of Playhouse June 29**

**Same Company All Returning. Season Includes Many Good Comedies**

The Vagabond Players, the only regionally operated professional repertory theater group in the Southeast, are preparing to open their 14th season on Tuesday, June 29th, at Flat Rock.

For their third season at the Flat Rock Playhouse, the theater again will be the huge tent, which has a seating capacity of 500 persons.

The opening play of the scheduled 10-week season will be "Legend of Sarah," a former Broadway comedy hit which originally starred Marsha Hunt and Tom Helmore.

Comedy will be the customary keynote of the summer presentations, and will include "Legend of

Sarah," "My 3 Angels," "Here Comes Mr. Jordan," "Apple of His Eye," "Travellers' Joy," and "Feathers in a Gale." Drama will be represented by Tennessee Williams' "You Touched Me," and "Angel in the Pawnshop." The "who-done-it" chosen this summer is the smash London hit, "Pink String and Sealing Wax."

The plays will run Tuesday through Saturday at 8:30 p. m. with matinees Wednesday and Saturday at 2:30 p. m.

Robroy Farquhar, who organized the Vagabonds in New York City in 1937 and brought the group to Flat Rock in 1940, will be the managing director. During the winter season, he is director of the Vagabond Touring Theatre and the Brevard Little Theatre.

Almost all of the members of

last season's company return to Flat Rock, including Will Sandy, Earl Dossey, Dorothy Masterson, Larry Bassett, Pat Orr, Bill Fegan and Robert Hoeflich. Other former players returning include Valeda Hill and Lew Gallo, leading players during the 1952 and 1951 seasons, respectively. Anita Grannis returns to direct the company and the sets will be designed again by Jack Freimann, assisted by Althea Scholl.

In connection with the Playhouse, a non-profit educational institution, the Vagabond School of the Drama will be conducted. Classes are scheduled to begin June 28th. Students from Florida, Illinois, New Jersey, North Carolina, South Carolina, California, Ohio and Virginia will attend the ten-week session. They will be housed with the professional company in the school building, situated adjacent to the tent theater.

The Flat Rock Playhouse is located three miles south of Hendersonville on the Greenville highway, U. S. 25.

**June Is Dairy Month Here And Throughout The Nation**

**Osborne Is Chairman Of Local Observance. Brief Review Is Given**

By STAFF WRITER

The observance of June Dairy month points up particularly the great accomplishments which have been engineered with the aid of science in making available to peo-

ple everywhere at every season nature's most important single food—milk.

C. Lewis Osborne is chairman of the June Dairy month observance here, and serving with him as assistant chairmen are Steve Ferguson, of route 1, Brevard, and L. B. Gosnell, of Pisgah Forest.

It was just about 70 years ago that the first successful commercial production of evaporated milk was effected. This was truly a great stride in milk marketing. Then for the first time did the homemaker have whole milk in a satisfactory form which she could keep on hand to use for anything. Prior to that time, the only milk which would keep safe and sweet indefinitely was truly sweet, for it had sugar added to preserve it.

Homemakers welcomed this new form of plain concentrated whole milk which would keep without refrigeration and was so convenient to use. Thus began the growth of this product which now takes about a sixth of the nation's yearly milk production. In order to meet today's consumer demands, over five and a half billion pounds of the milk produced each year is processed as evaporated milk. The widespread use of evaporated milk has meant, too, a regular outlet for milk produced by some 160,000 dairy farmers.

Nutritionally, evaporated milk is like the whole milk from which it is prepared. It furnishes all the nutrients of whole milk — the proteins, minerals, vitamins, lactose and butterfat. In addition, evaporated milk has extra vitamin D added. This is a plus value from the nutritional standpoint, for vitamin D is necessary for the body to make the best use of the milk's minerals, calcium and phosphorus, in building and maintaining strong bones and teeth.

Milk, evaporated milk is easily reconstituted by merely adding an equal volume of water. More importantly to good food preparation, however, is the versatility which evaporated milk affords because of its concentration and its homogenization. In making creamed and scalloped dishes or cream soups, for instance, the liquids from cooked or canned vegetables can be used to reconstitute evaporated milk. In this way all these flavorful and nutritious liquids are saved. And at the same time a full amount of whole milk is incorporated, making these dishes rich in milk nutrients and creamy smooth in texture. In cakes, puddings and other desserts, fruit juices can often be used similarly for diluting evaporated milk.

In many, many favorite recipes, such as custards, sauces, candies, frostings, evaporated milk is used just as it pours from the can, or partially diluted, to effect rich flavor and smooth creamy texture. Such uses mean extra amounts of milk are being consumed. According to recent market research surveys, one of the popular uses for evaporated milk is in coffee. Too, the fact that evaporated milk can be whipped is a great advantage in cookery. Again, this is where it can boost the whole milk value of foods. In order to whip, evaporated milk must be used in its concentrated form. This means that frozen desserts or other foods in which whipped evaporated milk is used contain double amounts of all the nutrients of milk.

When you think of prescriptions, think of VARNER'S.—adv.
