#### Farm Questions And Answers

Question: Briefly, what does the new North Carolina "egg law" mean?

Answer: It simply requires that eggs sold on grade meet the requirements for the grades repre-

Question: Why was there need for such a law in North Carolina as the "egg law?"

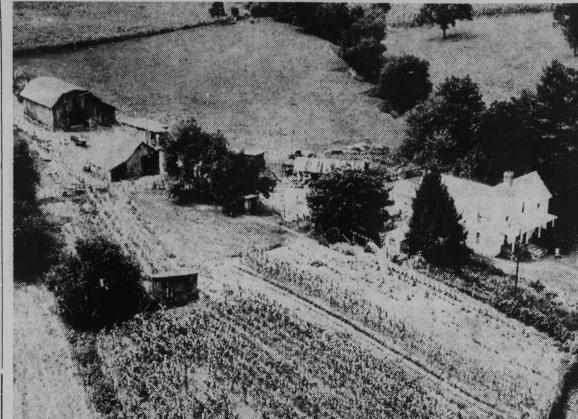

Answer: Certain distributors were making a habit of selling second grade "imported" eggs as first grade eggs in competition with locally-produced high quality eggs.

Question: How many more chickens would be needed in this state to produce enough eggs to meet its consumer demands?

Answer: A conservative estimate is that North Carolina producers would have to increase their flocks by 2,507,500 hens to supply enough

Question: After I store my grain under Commodity Credit corpora-tion can't I just forget it?

Answer: No. Loss in quantity and quality will be charged against the farmer when final settlement is made or he may lose his loan protection entirely. It's a good idea for the farmer to make frequent checks on the grain and take measures to correct anything that may need attention.

THIS WEEK'S MYSTERY FARM should be very popular, since the house, the barns and surrounding fields show up so splendidly in the above aerial photo. If you are the first person to dry by The Times office and identify it, you will re-

ceive a free subscription to this newspaper. The owner of the mystery farm is requested to come in and get a beautiful photograph of his property at no obligations whatsoever.

A New Taste Discovery to start baby pigs eating and gaining early

This exclusive Purina taste discovery contains Pura-Fat (selected fats), Pura-Sweet (selected sweeteners), vitamins, minerals, and other known ingredients to keep pigs eating and

Start creep feeding Baby Pig Chow at 7 days. Feed one 50 lb. bag to a litter... then change to Pig Startena.

That's the way to start'em on the market road in a hurry.

### Old Time Singing At Etowah Sunday

There will be an old time Christian harmony singing at Etowah Methodist church on Sunday, May 1st. Singing will start around 10 a. m. and persons attending are around 3 p. m.

All Transylvania folks have special invitation by Mrs. Verda Blythe, the secretary. This invitation is also extended to other coun ties. The secretary also urges old time singers to be present and bring their Christian Harmony song book and their spectacles.

as a cleansing agent helps save time and work.

To clean decorative objects of glass, china or pottery, dissolve three tablespoonfuls of baking soda n each quart of warm water used Then dip a clean soft cloth into this solution and carefully clean. Rinse with a second cloth wrung out of clear warm water; wipe dry. If the piece is carved or embossed, use a soft brush; dip in moistened baking soda and brush gently. Rinse with cloth wrung out of clear wa ter. Dry.

Cleaning Cooking Utensils -Cooking utensils and beverage makers of various kinds are subject to damage or destroy the house. stain formation. Thus, dried-on baking dishes and casseroles. Cof the pot or in cups in which the beverage is brewed or served. In the same way, containers used for growing ivy or house plants in waer often acquire stubborn green rings and discolorations. The use of the basic baging soda cleaning solution (3 tablespoonfuls of soda to 1 quart warm water) is a safe, simole, easy-to-use remedy.

casseroles, baking dishes or glass or enameled ware cooking utensils in which food has been cooked, put three tablespoonfuls of baking so da into the dish, fill with hot water and let stand a few minutes. Then wipe off the stain, wash and rinse.

There are now about 364 com nercial plants in North Carolina which maintain stocks of grains, china vases, bric-a-brac, figurines either seasonally or during the entire year. This is a 46 per cent increase over 1950.

## 'LET'S CLEAN-UP, NOT BURN-UP,' A CHECK-LIST FOR GUIDANCE

By STAFF WRITER

Clear out debris: Get rid of rubbish or anything combustible that asked to bring a picnic lunch as you're not going to use in attics, closets, cellars, garages. Rubbish, such singing will not adjourn before as old papers and rags, is a fire hazard. It not only starts fires itelf, but furnishes fuel for fires starting from other causes. Clean these hazards out of your house, store or factory.

> Watch outside fires: Clean up your yard. Keep grass cut low around buildings. Never burn papers on a windy day when there's danger of sparks setting fire to any house, shrubbery, clothing or outbuildings. Use an incinerator wherever possible.

> Clear out paint and oil rags: Destroy rags or keep in closed metal container; hang up mops and paint-soiled clothing so air can circulate around them. Paint or oil-soaked rags heat up from chemical action, burst into flames. Clean-up after painting jobs. Check your fuses: Use 15 ampere fuses in regular household cir-

> cuits, and don't make emergency repairs to fuses; keep wiring in good repair; have all work done by an expert electrician. Fuses protect your appliances, your house and your family from damage and possible fire when wires are overloaded or a short circuit occurs. Avoid flammable liquids: Remove them from your house. Hundreds

> of persons are killed annually trying to clean with gasoline, benzine or naphtha. A tiny flame or spark-even from static electricity-will ignite gasoline vapor. Play safe! Do not use highly flammable or explosive fluids for dry cleaning!

Check stoves and heaters: Clean and check all heaters and have repair work done. Radiated heat from hot stovepipes, furnaces, and stoves will char beams or partitions too near them, causing a fire that will

Portable heaters: Place portable, openflame heaters so they can't be foods form hard-to-remove rings on knocked over or tipped. Avoid using rubber hose as fuel conductors for gas heaters; rigid metal pipes are safer. Always store kerosene outfee and tea leave brown stains in doors, fill lamps and heaters outdoors. Don't carry or fill heaters while they are lighted. Keep a door or window open slightly while heater is

Check pipes and chimneys: Clean soot out of chimneys and smokepipes. Check for cracks and holes; have chimneys repaired-where mortar or bricks are loose-and replace pipes if necessary. Dirty and defective chimneys are a leading cause of fires.

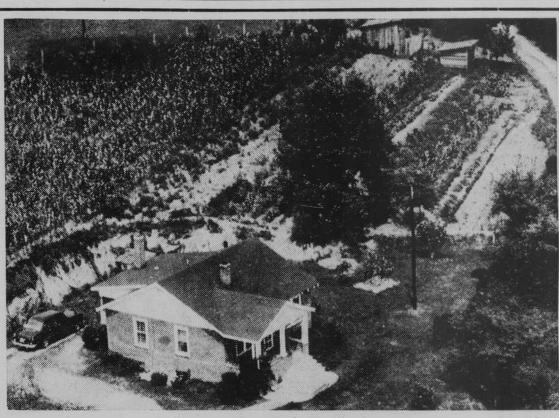

Check ash receptacles: Always put hot ashes into covered metal containers. Hot ashes in wood boxes set fire to many houses. In the cellar this is particularly hazardous, because flames quickly spread up To remove dried-on stains from through hollow walls of building.

Fireplace care: Use a wire-mesh screen in front of fireplace. Be sure the fire is out before you retire or leave the house. Sparks from unguardd fireplaces can start serious fires.

General repairs: Plan needed painting and renovating this spring. Remodel and modernize your home for greater safety. Replace faulty stair treads. Install a heavy flush-type door at head of cellar stairs, fitted tightly and kept closed. This will hold basement fires in check.

Smokers: Don't smoke in bed. Smoking in bed can be fatal. Fumes from burning cloth may overcome or asphyxiate you before fire reaches you. Place plenty of ash trays about your home for smokers. Keep matches in safe containers and away from young children.

LET US DO YOUR JOB PRINTING Dial 2-4111 The Transylvania Times

Carroll Merrell was the first person to correctly identify the "Mystery Farm" published last week as the property of Bly Rogers at Cherryfield. Others who submitted guesses were Mrs. A. E. York and J. S. Simms. Guesses should be submitted in person at The Times office; none can be accepted over the telephone.

Most everybody's happy on a honeymoon! But it looks like this couple will STAY that way. Why? Well, for one thing, they know that SAV-ING makes the difference between wishing and having. Already they've started an account in this bank. They're all set on a program of systematic savings that will build solidly for their future happiness . . . together. Why not write your own "success story" in the pages of your savings account book?
