Budget for the 1958-'59 Transylvania county United Fund will be adopted at a meeting of the entire board of directors which is being called for Monday night, Sept. 22.

The meeting will be held in the court house at Brevard, and the 40 officers and directors from all sections of the county are expected to attend and go over the items for inclusion in the budget, according to Wayne Bradburn, chairman.

New Bridge To Be Constructed Across French Broad Near Davidson Station

Approaches Will Be Vastly Improved To Prevent Future Flooding

A new bridge across the French Broad river near the Davidson River sub-station is one of the projects for which the North Carolina Highway commission has advertised for bids.

The commission will meet in Waynesville on Sept. 29th and 30th to review the low bids, and there is a good possibility that work can be begun on the bridge within the next 30 days.

In addition to building a wider and higher bridge, the approaches from both sides will be vastly improved, highway officials state.

When completed the project will be much like the new bridge at Penrose.

Actually, the French Broad bridge and approaches will be improved for a distance of one-half mile. During periods of high water in the past, the road has been closed on many occasions. This flooding condition will be eliminated with the raised approaches.

For quite some time, the people of the Little River community and public spirited citizens in Brevard have tried to get a new bridge across the French Broad below the sub-station.

The present one has such a low load limit that it will not permit the crossing of Brevard's new fire truck, which is especially designed for fighting rural blazes.

At least two homes could have

More Fire Trucks Will Answer All Alarms Here

In compliance with the new regulations of the Underwriters Rating Bureau, the Brevard fire department today announces some changes in operating procedures in answering alarms in the town.

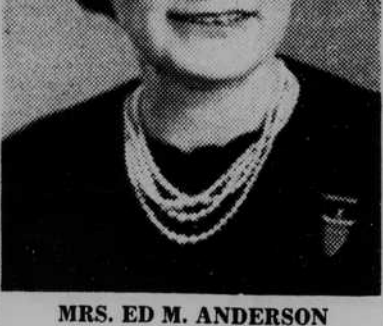

According to Fire Chief Dan Merrill, all three trucks will answer an alarm in the business section of Brevard, and the two

large trucks will go out on all fires in the residential area.

The chief reports that the extent of a fire is never known, and oftentimes a second truck is needed to back up the first by laying lines to the scene of the fire.

Brevard has made much progress in its fire rating during the past 10 years, moving from class 10 to sixth class. This new requirement could cause the town to improve its rating even more, the chief points out.

Except for a fire in an industry, only the truck that is specially designed for fighting rural fires will be used for blazes outside the city limits.
