

Youths Aid The Economy

By - Staff Writer
Transylvania county's teenage population has become an economic force to be reckoned with — a \$2,153,000 force.

As a consumer group, they have this impressive amount of money at their command, a matter of great interest of local retail merchants.

Equally important, from a business point of view, is the influence these youngsters wield in determining how their parents spend money. They help decide the kind of car that is bought, the appliances that are purchased and the type of improvements that are made in the home.

In Transylvania County, as in most other areas of the United States, the teenage population is large and is growing larger rapidly, it is shown.

In 1960 there were 2,385 boys and girls locally between the ages of 13 and 19, according to the Census Bureau. The number is expected to be about 30 percent greater by 1965.

The rate of growth in this age category is found, in line with the national trend, to be 3 1/2 times faster than that of the population as a whole.

But sheer numbers is only part of the story. Teen-agers locally have bigger allowances than ever before. One reason is that their parents can afford to give them more. Another is

High reading for the week came on Saturday afternoon
