

Public Is Invited To Formal Dedication Of New Tracking Station

The public will get a look at the new Satellite Tracking and Data Acquisition Facility of the National Aeronautics Space Administration above Rosman at formal dedication ceremonies and open house on Saturday, Oct. 26th.

The multi-million dollar station will be open to the public at 12:15 p.m., with the formal dedication ceremony slated to begin at 1:45 o'clock.

This new tracking station, the second of its kind in the

world, is located in upper Transylvania county in beautiful Pisgah National forest.

Because of limited parking space, visitors are requested to form car pools.

There will be shuttle buses from the parking area to the tracking station.

Open house will continue Saturday afternoon until 5:00 p.m.

In case of heavy rains during the morning, the formal cere-

mony will be cancelled. Should it rain during the program, the ceremonies will be moved into the administration building.

Special music for the program will be furnished by the Brevard high school band, with John D. Eversman directing.

The program is as follows: National Anthem

Master of Ceremonies, The Honorable Roy A. Taylor, Member of Congress

Invocation by The Reverend Dr. Emmett McLarty

Introduction of Guests

Welcome by The Honorable Austin Hoised, Mayor of Rosman

Remarks by The Honorable Sam J. Ervin, Jr., United States Senate

Remarks by The Honorable B. Everett Jordan, United States Senate

Remarks by Dr. Harry J.

Goett, Director of Goddard Space Flight Center, Demonstration of space communications.

Address by Dr. George L. Simpson, Jr., Assistant Administrator for Technology Utilization and Policy Planning of the National Aeronautics and Space Administration

Address by The Honorable Terry Sanford, Governor of North Carolina

Benediction by The Rever-

end B. W. Thomason, Mayor of Brevard

Adjourn

Tours of Site for the Public Music by Brevard High School Band

The new tracking site will be used to acquire scientific data from NASA scientific satellites some of which may be orbiting the earth some 60,000 miles up.

The station is linked with

NASA's Goddard Space Flight Center at Greenbelt, Maryland.

If atmospheric conditions permit, the public may witness and possibly participate in a voice "roll call" with other NASA tracking stations located in Alaska, Australia, South Africa and London, England.

Rosman is Ideal Location

The location, about 17 miles southwest of Brevard and about 7 miles from Rosman, is almost completely free from radio fre-

quency noise. This is essential because the transmitters in satellites are very low power (five watts or less) and some satellites, more than 60,000 miles away, will be difficult to "hear."

It is only about 400 air miles from Goddard. This reasonably proximate is important for reasons of communication and liaison.

Rosman also has the following advantages:

It is one of the very few

THE PISGAH FOREST, N. C., OPERATIONS of Olin Mathieson Chemical corporation are being dedicated as the Hanes Works on Wednesday, October 30th, honoring John Wesley Hanes, pictured

in the inset. These operations manufacture a wide variety of types of cellophane, cigarette paper, lightweight printing papers, and specialty items for the tobacco industry.

Olin To Be Dedicated As Hanes Works At Ceremonies Wednesday

Town Has Water Shortage

Due to the long dry spell, Brevard has a water shortage. It was necessary on Tuesday night for town officials to call on the firemen to pump water from King's creek to the reservoir.

Engine No. 1 is now being used for pumping from the lower part of the creek to the raw water line, a distance of 260 feet.

Bill Edens, town manager, says that A. P. Thomas, WNC largest grower of glads, has offered a fine irrigation pump, which will be put into service immediately.

All residents are urged to conserve water every way possible. They are asked not to water lawns, wash cars, etc.

The situation is serious, and only a heavy, steady rain will bring relief.

The Weather

Little precipitation fell on Brevard during the past week, and that which was recorded was apparently only dew accumulated overnight.

The forecaster promises some slight relief from the dry weather of the past three weeks, with an average of a half-inch of precipitation during the next five days.

Temperatures through next Monday will be a few degrees above average highs and lows of 65 and 42.

Last week's high and low were 82 and 24, with daily averages of 76 and just under 32.

| Readings for the week were: | |
|-----------------------------|-------|
| High | Low |
| Wednesday | 74 28 |
| Thursday | 76 24 |
| Friday | 74 28 |
| Saturday | 74 32 |
| Sunday | 82 36 |
| Monday | 78 38 |
| Tuesday | 74 35 |

| Readings for August and September were as follows: | | | |
|--|-----|-------|------|
| High | Low | Prec. | |
| August | 92 | 43 | 3.72 |
| September | 84 | 31 | 4.74 |

Pisgah Forest Plant Honors Famed Advisor

The Pisgah Forest, N. C., operations of Olin Mathieson Chemical Corporation will be dedicated as "The Hanes Works" in a ceremony at the site of this industrial complex on October 30th.

The dedication will be in recognition of the services of John Wesley Hanes to the company and to the community.

An intimate advisor and associate of the late Harry H. Straus, who founded the Ecusta Paper Corporation at this location, Mr. Hanes was instrumental in molding Ecusta with the Olin industrial structure and in bringing the Olin Cellophane venture to North Carolina. His efforts and influence have been major factors in promoting the growth and success of the paper and film enterprises, and their consequent economic influence on the community and on the state.

The Pisgah Forest organization consists of the Ecusta Paper Operations and Film Operations of Olin's Packaging Division. Ecusta, the oldest of these operations, was established in 1939. The Film Operations built its first cellophane plant and established its headquarters here in 1950.

Ecusta's original and rather

Imperial Motor Lodge Opens

Brevard's new motor court, the Imperial Motor Lodge, is now open.

The owners, Mr. and Mrs. W. H. Ingram and son, Buddy, made the announcement today that the new facility, which has been under construction for some seven months, is now open to the public.

The Imperial Motor Lodge, completely modern in every detail, has 24 separate units that can accommodate 100 persons. Among the many outstanding features of the new motor lodge is a heated swimming pool. Each unit also has a television set.

The Ingrams state that a

Awards Banquet In Rural Contest Slated Thursday

The annual Awards banquet for 1963 in the Transylvania Community Development contest will be held at Olin Mathieson Chemical corporation on Thursday night of this week.

Community club members and others will be guests of Olin. The banquet will begin at 7:00 o'clock.

Senator Oral Yates, of Waynesville, will be the principal speaker, and Ralph Lee, president of the Community Development council, will be the master of ceremonies.

Special guests will be introduced by Grover McPherson, president of the County Agricultural Workers council.

Keitha Fay McCall, a member of the Balsam Grove Community club, will introduce Senator Yates.

Awards will be presented by Jack Hudson, county attorney, and Morris L. McGough, of Asheville, representing the Asheville Agricultural Workers Council.

In Washington Friday

Henry Henderson Receives Highest Degree In Masonry

HENRY R. HENDERSON

Henry R. Henderson, Masonic leader in Transylvania county, will receive the highest degree in masonry, the 33rd degree, in special ceremonies in Washington, D. C., on Friday, October 5th.

He is the first Transylvanian to receive this honor, which is awarded on the basis of distinguished service to masonry.

He was elected at the Biennial Session of the Supreme Council, according to Thomas J. Harkins, past sovereign grand commander and sovereign grand inspector general in North Carolina.

Mr. Henderson will attend a luncheon, a formal dinner, and the special ceremonies during which he will be awarded the

Du Pont Construction Forces At Brevard Plant Win Safety Award

The Brevard Construction division here at the local Du Pont plant has received the Chief Engineer's award at an Award Safety Rally with the entire personnel attending.

The award was made by safety officials from the Wilmington, Delaware, headquarters, who were high in their praise of the construction forces of Du Pont here at the Brevard plant.

They pointed out that on February 5, 1962, the first man was

placed on the Du Pont roll to start the Photo Products expansion here.

Since then, an average force of 371 Du Ponters have worked a total of 1,208,000 hours without a lost time injury, and in so doing they are receiving outstanding recognition from the Du Pont chief engineer.

In making the presentation to A. D. Day, field project manager here, C. E. Daniels, assistant

chief engineer at Wilmington, said:

"You have qualified for the award by virtue of the Du Pont roll forces working 600 safe days for a total of 1,208,000 safe hours. We are happy to welcome the fixed-fee contractor forces to the meeting and to have them celebrate with us, since we are as interested in their performance as we are in the Du Pont roll. We regret exceedingly the ac-

cident of last August and hope that both Du Pont and contractor forces will now go through the rest of the job injury-free.

"It is interesting to note at this point that the over-all construction safety performance at this site is better than the award figures indicate, since there were two previous construction periods which were injury-free but of insufficient duration to qualify for an award. If we could

add these periods to yours, the total would become 1,519 safe days and 1,513,800 safe hours. You might have won this award earlier, but I am happy to say you could not have done a better job.

"Safety ceremonies such as this are always pleasant because it is a happy occasion when we can celebrate absence of personal injury. We, of management, are particularly pleased when we can be

part of such ceremonies, since it is one way that we can offer concrete evidence of our support of, and strong belief in, our safety activity. Management's part, all too often, is in planning and reviewing safety programs; and it is only occasionally that we have the opportunity to personally participate."

In accepting the award, Mr. Day stated:

"This award is accepted on be-

half of the people who made it possible. We do so with a feeling of humility in that we recognize that with greater effort on each of our parts, we might have reached this point without unpleasant memories.

"I would like to take this opportunity to thank each of the members of our team for their individual efforts and ask that we all join in a rededication of ourselves to that kind of self-discipline which

allows each of us to return home safely every day."

In salutatory remarks prior to the presentation of the award, B. B. Lewis, assistant manager, Construction division at Wilmington, said:

"I want to extend to you my congratulations on your achievement of the chief engineer's safety award. It is especially noteworthy that since the start of construction
