Big Parade Next Tuesday To Open 1963 Christmas Season

Plans for the Christmas parade that will usher the 1963 Christmas season into Brevard have been announced by Dewey Nix, chairman of the Merchants Division of the Chamber of Commerce.

The event will be held Tuesday, December 3rd, and will begin at 5:00 p.m., marching up East Main street, and following a route described in detail in a large ad found elsewhere in this issue of The Times.

A number of units including 9 beautiful floats designed especially for the occasion, many beauty queens, four bands, the Shriners Motorcycle Corps, clowns, and other entries will make up the long parade.

Santa Claus himself will arrive atop one of the floats.

The parade committee announced today that the lineup is complete and no other entries can be accepted.

They also urge the public to use the entire parade route so that no one area will become too congested.

The merchants extend a cordial invitation for everyone to attend the parade and to shop in Brevard this Christmas.

Prediction Made

Transylvania's Population Will Exceed 18,000 By '80

Transylvania's population will exceed 18,000 by 1980, if the present trend continues, according to a survey that has just been completed under the direction of the State Department of Conservation and Development at Raleigh.

The predicted figure for 1980 for Transylvania is 18,095.

By 1970 it should be 17,278, the survey reveals.

The 1960 census was 16,372.

North Carolina's population will exceed five and one-half million by 1980 if present trends continue.

Approximately two-thirds of the predicted gain of 991,764 by 1980 in population over the official census of 4,556,155 in 1960 will occur in four counties — Mecklenburg, Guilford, Forsyth and Wake.

Net gains in population by

1980 are predicted for 52 of the State's 100 counties, with losses indicated for the remaining 48.

Most of the increase of almost a million persons by 1980 is indicated in the urban Piedmont counties. Heavy population losses are predicted for some rural eastern and mountain counties, with Warren County suffering a 37 per cent loss.

These figures and predictions are taken from a major study recently completed by demographers Josef (cq) Perry, formerly with the Division of Community Planning of the State Department of Conservation and Development, and Dr. C. Horace Hamilton, a member of the faculty of North Carolina State, the University of North Carolina at Raleigh.

Known as "1980 Population Projections for North Carolina Counties", the study contains a detailed projection for each county by age, race and sex for 1970 and 1980 as well as the official 1960 census.
