Construction of this plant, which is recognized as the world's most modern photographic film manufacturing plant, began in 1962.

The plant represents a major addition to the economy of this entire area, with employment expected to reach the five hundred level by mid year.

Employment during the past months of construction was around 1,000 persons.

Plans are being laid to give the public an opportunity to inspect these remodeled and new areas.

Announcement of the date will be released in the near future, Mr. Morrison stated.

The plant is located on a 10,500 acre tract near Cedar Mountain in Transylvania and Henderson counties.

Governor Terry Sanford presented a check for North Carolina's quota to the mother of late president, John F. Kennedy, to climax the ceremony.

Luther Hodges, secretary of commerce, and Dr. Billy Graham, the world's greatest evangelist paid eloquent tribute to Mr. Kennedy.

A growing number of men, women and children in Transylvania county are reaping the benefit today of money that was set aside for their protection during the last 26 years.

The money comprises the amounts that were deducted from payrolls each week and matching payments that were made by employers. They went into the Social Security Trust Fund.

Now, as a result, retired and disabled workers, as well as their wives, children and parents, are protected financially.

Monthly pension checks are going to 1,754 people in the county, the Social Security Administration reports.

As an indication of the rate at which the program has been expanding, the number of local residents who were on the receiving end a mere three years ago was only 1,307.

The increase, which is 34.2 percent, compares with a 28.7 percent rise in the United States as a whole and 33.2 percent in the South Atlantic States.

The steady expansion of the program, designed to bring in categories of workers who had not been covered previously by Social Security, is chiefly responsible for the growth. By degrees, steps are being taken that will —Turn to Page Three
