TRACKING FROGS IN SPACE — This is a nighttime photo of the large 85-foot tracking an-tenna at the Rosman STADAN station. The inset, lower right, is a picture of Ted Gohrs inside the station, operating the antenna. The present operation is tracking NASA's O F O spacecraft, an experiment orbiting two live bullfrogs in a study of how man's inner ear helps him keep his balance.

Rosman is one of the prime stations receiving data from the satellite as it passes over this area. The antenna, which is 85 feet across the dish and weighs some 300 tons, can track satellites far out in space. The Rosman station is linked with the Goddard Space Fright Center at Greenbelt, Maryland, which has the responsibility for scientific exploration of space in the cis-lunar region.

# Thanksgiving Union Service Planned, Schools Will Close

Reverend F. H. Goldsmith, Pastor of Bethel "A" Baptist church, will deliver the Thanksgiving sermon and the Rever-end Thomas B. McPhail, Assist-ant Minister of the Presbyterian hurch, will assist in the leadership of the worship.

There is no more fitting way for American Christians to observe Thanksgiving than to join in the honorable tradition of their forebears for corporate worship and public thanksgiving to their Creator.

The service will begin at 11:00 o'clock Reverend Goldsmith's sermon topic is "Forgiveness Before Thanksgiving."

The Transylvania Minis-terial association is sponsor-ing the service, and the pub-lic, and the public is most cordially invited to attend.

Other ministers participating in the service will be Rev. Donald C. Hicks, Rev. Nolan Ford and Rev. Edsel L. Keith.

A nursery will be provided. Bible Reading Guides for attional Bible Reading Seaon, November 22 - December 5, are available at the church Office of the Brevarddavidson River Presbyterian church, for all who would be is most cordially invited —Turn to Page Six

### **Police Chief Warns Against Holiday Thieves**

Holiday time is open season for petty thievery, warns Brevard Police Chief, J. C. Rowe.

"People are busy shopping. They go to and from their cars, leaving packages and pur-chases in tempting sight in their unlocked vehicles. Worse still, they oftimes leave the car keys in the ignition lock.

"This is a made to order opportunity for professional thieves and a strong temptation for amateurs.

"Ladies are particularly bad about leaving their pocketbooks in cars," says Chief Rowe. I once walked four blocks on Main Street and counted 9 handbags left in plain sight in

"We strongly urge everyone to follow a few simple precau-tions to avoid having their holi-day season ruined by thieves:

"One, never leave handbags in sight in a vehicle—locked or unlocked. A handbag, with its promise of cash, is good reason for a break-in.

# Rosman Tracking Station Now Receiving Data From Space Frogs

### **Experiment** Is Studying Human Ear And Balance

Two live bullfrogs have been orbiting the Earth every 1 and 1/2 hours since launch on November 9th in an experiment aimed at providing new information on how man's inner ear helps him keep his balance.

The NASA Tracking Station at Rosman has been one of the prime stations receiving data from the satellite as it passes over this area. Bob Allison, Operations Manager, has indicated that no problems have been encountered in the support of O F O satellite passes at the station.

After several hours in orbit, the frogs were reported in good condition and the spacecraft was transmitting scientific data on the functioning their otholith sensor cells. A frog's otolith functions much like that in man's in-

The National Aeronautics and Space Administration's Orbiting Frog Otolith (O F O) satellite was launched at 1 a. m. EST on the 9th from NASA's Wallops Station, Wal-lops Island, Va. Riding piggyback on the Scout launch vehicle was another spacecraft with radiation and meteoroid experiments. The two satellites separated about nine minutes after launch.

The frogs have been moni-tored during the past week alternately in weightless con-ditions and periods of par-tial gravity created by spin-ning them in the centrifuge that houses them. Fifty revolutions per minute provides a one-half "G" acceleration condition. One "G" is the

BREVARD'S BETSY ROSS, Mrs. Mabel Alderman, is pictured above right, presenting the beautiful Brevard College flag that she made to Dean Grady H. Whicker, left, of the college's administrative staff. Mrs. Alderman hand-cut, pieced and sewed the flag herself, working into the wee hours of last Thursday

morning to have it ready for the color presentation at the big Tip-Off Basketball Tournament at the College Thursday night. Her efforts were not in vain, as her hard work was rewarded with a resounding Brevard victory over Hudson Valley, New York in the opening round of the tournament. (Times Staff Photo)

### Dr. Matheny Now Practicing Optometry With Dr. McGuire

Dr. Glenn S. Matheny has begun the practice of optometry here in Brevard. He will be associated with Dr. Frank B. Mc-Guire, Jr., in Dr. McGuire's new office located at 290 North Broad street.

Dr. Matheny is a native of Highland Park, Michigan. and received his early education in the schools of Byron, Michigan. He received the Bachelor of Science degree from Michigan State University in 1964 majoring in chemistry and biology.

At Michigan State he was member of Farm House Social Fraternity.

He received the Bachelor of Science and Doctor of Optome—Turn to Page Two

### Latest Survey Reveals More Local Families In Upper Brackets

How well are Transylvania County residents making out financially? What proportion of local families are now to be found in the upper income

According to a nationwide survey, rising wages and sal-aries have carried most families in the area to higher positions on the income ladder.

Just where they stand, cur-nity, is brought out in a pyrighted report issued by les Management, the mark-

income in a locality represents earnings that are well distributed among the bulk of the population or whether it stands for a small proportion of families with very large incomes compensating for a much larger number with low incomes.

In Transylvania County, it finds, the level of earnings and the distribution are relatively good. Some 63.5 per cent of the households in the local area had disposable cash incomes, after taxes, of \$5,000 or more in the past year.

The proportion of familles with net incomes over \$5,000 was greater than was reported for many parts of the country. In the State of North Carolina as a whole there were 62.1 per

farm families do not appear to their best advantage, as no allowances were made for the lower living costs on the

The Transylvania County breakdown gives the position of each group of local families on the income ladder. It lists 22.4 per cent of them on the \$5,000 to \$8,000 rung, 15.0 per cent at the \$8,000 to \$10,000 level and 26.1 per cent above \$10,000. The remainder are below \$5,000.

Nationally, according to Commerce Department fig-ures, the median income of ures, the median income of families rose 9.3 per cent during the past year. However, since consumer prices rose 5.4 per cent, the real gain in family purchasing power was
