

# Historical Groups Will Meet At Cedar Mountain Oct. 31st

The North Carolina Society of County and Local Historians will hold its Fall Tour in Transylvania County, Brevard, on October 31, at Cedar Mountain, in cooperation with the Cedar Mountain Community of Western North Carolina Community Development Program. This community was particularly distinguished for its citizen-involvement effort this past month. Also cooperating in this joint honor is the organization of the Transylvania County Historical Association.

This meeting will be held at the Sherwood Forest Barn, Cedar Mountain, and the out-of-town visitors will make headquarters at the Robin Hood Barn and will occupy cottages in the Forest. This announcement is made by: Mrs. Margaret McMahan, Secretary, Fayetteville, and Hugh B. Johnston, Tour Chairman, Wilson.

This organization calls for a well-organized program of activities, which will make the Society known and respected in the State of North Carolina. One

of its members, Miss Medley, has personally financed the cost of a statewide survey of 100 counties, seeking information on the number of published county histories and active historical societies in the counties of the state. This is being put under way by the corresponding secretary, who will tabulate results for the records and for possible future projects of the Society.

The major work of the Society now is to bring membership in line. The dues are:

- Regular Dues — \$3.00
- Sustaining — \$10.00
- Life Membership — \$40.00
- Contributing — \$5.00
- Husband and Wife — \$5.00

Memberships are solicited and invitation to attend this joint meeting is extended.

## Science for You

BY BOB BROWN

PROBLEM: Why the balance does not work.

NEEDED: Ruler and string, coins.

DO THIS: Suspend the ruler on the string above a table top, and try to balance coins on it. It does not work well. Put a screw eye in it, tie the string to it, and the ruler becomes a balance that can be used to show the principle of the lever.

HERE'S WHY: The ruler cannot balance if suspended by a string from the lower side, because the center of gravity is above the suspension point of fulcrum. Either one side or the other will go down and touch the table top. Suspending it by the screw eye places the balance point above the ruler, and a balance can be effected as long as the coins are not stacked too high.

This special "Science For You" feature is sponsored by Olin Corporation at Pisgah Forest in co-operation with The Transylvania Times.

There was a meeting held at the Red Hill Center on Sunday afternoon. Plans were made for a Halloween party. The exact date to be yet announced to not conflict with the schools carnivals, etc. There were seven board members present and the group decided to help an elderly couple who have had sickness for quite sometime. If you are asked to contribute in any way, it will be most helpful and appreciated. There will be papers sent around typed by the secretary and the children and adults will all participate.

There was quite a bit of excitement in our section last Thursday when three young men, one of whom resides on Ross Road, Thomas Fisher, was seriously injured when a car in which he was riding plunged down an embankment near he Charlie Green home on Hannah Ford road. We were told on Sunday that Thomas was still in intensive care in Mission hospital, Asheville. We hope he will soon be well and able to come home.
