

## Beautify America - Feed Children, ...Especially In School Lunchrooms

By - Staff Writer  
Beautify America - Feed Children!  
Transylvania County Schools observed National School Lunch Week - October 10th - 16th.

The universal menu, planned by the American School Food Service Association was served in all schools on Wednesday. The menu was: School Pizza, Green Beans and Butter, Tossed Salad, Applesauce, Brownie, and Milk.

The observance of National School Lunch Week was built around the theme, "Beautify America - Feed Children". This annual observance is designed to increase understanding of the contribution of the National School Lunch Program, not only

to all children, but to the home, farm, industry and the nation as well.

A school lunch isn't just any lunch - there's a big difference! It's a matter of education.

You can't teach a hungry child! Nutritious, well balanced school lunches provide the energy which makes it physically possible for children to learn. But school lunchrooms do more than just fill empty stomachs. Under the direction of trained food service personnel, they become living laboratories. In this lunchroom laboratory children "learn by eating" the foods their bodies require.

It's a matter of nutrition!  
Consider the quality of the

food. A school lunch supplies the minimum requirements for one-third or more of your child's daily nutrition needs. This includes a serving of good lean meat, poultry or fish; two or more vegetables or fruit; bread and butter and milk. No "empty calories" here - just vital nutrients.

It's a matter of economics. School lunch makes sense educationally, nutritionally and economically.

Last year in Transylvania County, four of the lunchroom operations had above 89% participation. In two of these schools, two of them with over 95% participation and one school had 99% participation for the year.

### TOO MANY DRUGS?

The question is often asked, "Aren't there too many similar products on the market?"... Many - yes, but not necessarily too many. The small variation in a particular drug may be responsible for the successful treatment of that next illness of yours. Your doctor and your pharmacist are constantly studying these new products. So, when your doctor prescribes...
