4-H Horticulture Project

The 4-H Horticultural Program provides an exciting adventure with living things. Indoors you can have greenery at every season when your garden indoors. You can grow flowers from seed or start new plants by rooting cuttings or leaves, even on an apartment window-sill. Outdoors, you can grow your favorite vegetable (corn, beans, sweet potatoes). Love strawberries? Grow your own. Remember, it takes two years for fruit plants to bear fruit. They'll taste better for the waiting.

For beauty, an artful arrangement of flowers can add color to a dark corner of your home. Gay flower pots can brighten a winter window. Shade trees add comfort as well as beauty. Fruit trees will yield flowers in spring, fruit in summer. Be creative! Plant for beauty.

For profit there is always a market for garden produce. Set up a road-side stand to sell your own fruits and vegetables, or specialize in one large crop and contract it to a commercial cannery. Raise chrysanthemums or gladiolus for a local florist, or tending lawns and gardens for vacationing neighbors.

For excitement, join 4-H and be a part of nature's miracle. The fun is yours in 4-H.
