DEMOCRATIC ORGANIZATION.

The Democratic Executive Committee of this State needs remodeling, reorganizing and a general shake up and change. Not one word against the gentlemen of the present committee; they worked faithfully and were successful; but a new fight will soon be on hand, and a thorough and complete organization of the party throughout the entire State is necessary. A work is to be done that men peculiarly adapted to it should be selected; men who are acquainted with the machinery of politics, who know how to set to work the cross-road politicians; and who can put their finger on the working politician in every community. A committee should

be selected who are posted not only on the strong points in the campaign issues but who know the local disturban es and who will look after harmonizing all the shorn lamb. petty dissensions which may exist.

While we are not concerned about the result in this State whenever a square fight is made, yet it is evident that the Republican party has revived and are expectant, by the aid of Independents, to gain control of the State Government.

It is not generally known, but it is in all but the worst weather, and is in nevertheless a fact, that the English reality a working sail and not a kite in sparrow is good for food. Those who have tried them say they are quite equal yard, which is hoisted to the masthead, the heel coming half way down the mast to reed birds and are prepared for the where it is secured. A headstay leads table in the same way. We hope our sportsmen will go for the little cusses, pardon the expression, but they have quarter. Thus the topsail is independent of the mainsail, and can be maneuvered worried us like sin lately and we at will. When running before the wind want revenge. They are enemies of other the mainsail is winged out one side and birds and make war on them. They de the topsail on the other. The cut of these rigs gives them a very smart look on the stroy gardens and fruit, blossoms and wind. So keen has competition become buds. It will soon be impossible to raise all round the coasts that piles of sandbags grain for they scratch up the seed and eat it. They have been increasing rapidly in as in racking machines about New York,

For two years I have been confined to bed with a loathsome form of Blood poison, which had about eaten me up, and I and others had no hope of a recovery. For a while I could neither walk, sit down nor lie down, only in misery as my flesh seemed to be falling off my bones in pieces as big as a hen egg. My appetite was lost, my bones ached and pained me, and friends even shunned me. I used various blood purifiers with out benefit, and several physicians treated me until large sums of money had been expended, but not one particle of good did any one give
