(By International News Service.)

It has been decided to publish weekly lists of these offenders in order that the public may be warned of their practices. The first one of these lists contains the names of more than 150 storekeepers who have been convicted of petty larceny and sentenced to fines and short terms of imprisonment. The fines imposed upon the culprits range from \$2.50 to \$125, and the prison terms from one day to four weeks. A butcher was fined \$75 because he tried to make an extra profit of 1-1/2 cents on a pound of sausage, and a grocer who demanded two cents more than the legal maximum for ten pounds of potatoes has to go behind the bars for ten days.

Mr. Hughes charged that the signing of the Lusitania with more American lives lost and loss of American prestige was caused by a weak policy. He endorsed woman suffrage and denounced all plots whatever in the interest of all foreign nations. The nation is shockingly unprepared. He urged adequate national defense and greater navy protection on the Western and Eastern coast, a larger army and greatly reinforced navy he believes to be necessary.

National prosperity was characterized as a false paradise brought about by abnormal war conditions and advocated protective upbuilding policies.

## BREMEN WILL COME INTO BOSTON ON SURFACE

(By International News Service.)

Boston, July 31.—United States army engineers, in whose office here the surveys of Boston harbor and the coastal waters hereabouts are made, are of the opinion that if the German merchant submarine comes into Boston harbor, she will rise to the surface some distance in this port and come in running on the surface of the water. According to the plans in the engineers' office, the Bremen, if coming via Broad Sound, would not have submerged further than Fines Light. There the water is but 8 1-2 fathoms or 50 feet deep. The Bremen draws but 37 feet on the surface, but needs at least 50 feet of water submerged. The engineers point to the fact that the boat may be well below 50 feet to escape being rammed by a mining steamer. Should the Bremen come via the Narrows, it must rise on the surface when off the Boston lightship. At this point the water is a 50-foot depth to 35 feet at President's Roads. It is thought that the danger of being rammed would prevent the Bremen from coming in submerged. It is also pointed out that once within the three-mile limit, it is not necessary for the boat to submerge. It could come on the surface and would be under the protection of the United States.

### Russians Can Drop Enormous Bombs

(By International News Service.)

Petrograd, July 31.—A new system of air tactics has been worked out for Russian big aeroplanes. The great Ilya Murometz, the aeroplane in question, has at last come into its own.

As a result of an improvement in photo technique, the airmen, even when traveling at full speed, can drop bombs with amazing accuracy. This solves the problem of bombing trenches. Manned by four men, the Ilya Murometz can carry bombs nearly as heavy and deadly as the Krupp 45-centimeter mortars can shoot. They drop these bombs, it is claimed, more accurately than the Krupp guns, and they are infinitely more mobile. High spots of flame can be seen rising from the enemy's lines, and the explosions are so terrific that when the enemy trenches are hit, Russians have to crouch and keep their ears against the effects of the concussion.

### GIRL INVA LIVES \$4,000 A YEAR FOR EXPENSES

(By International News Service.)

New York, July 31.—The investigation of the Black Tom Island explosion is expected to result tomorrow in the arrest of high officials of the Lehigh Valley Railway.

Criminal negligence and possibly manslaughter are the charges. The New Jersey authorities express their determination to prosecute vigorously the men responsible for the killing of more than one hundred people and property losses of more than \$20,000.

Three men were arrested charged with manslaughter, Theodore Johnson of the Albert Dickman Company agent of the Lehigh Valley Railway, Alexander Davidson, of Brooklyn, tender of the National Forge Companies plant on Black Tom Island. A warrant was also issued for the arrest of Edwin McKennie, President of a storage warehouse company.

Evidence unearthed by the police and public prosecutor show that the fire started in two box cars loaded with ammunition on Black Tom Island pier on the Lehigh Valley Railway. The origin of the fire was incendiary, according to the Company's agent after he was placed under arrest. The car on which the fire originated arrived only two hours before the conflagration.

Other fires have frequently broken out on Black Tom Island, which were not reported to the police. Vast quantities of ammunition is still stored in the danger zone. Barrels are still floating in the Hudson river and there is great danger to navigation.

Parts of high explosives were found where other ammunition is stored. Commissioner of Public Safety, Frank Hogan, of Jersey City, asserted: "We have sent ten detectives to investigate the disaster. We don't know where these barrels were from and can't get the information from the railroads."
