LIFT YOUR CORNS OFF WITH FINGERS

Tells how to loosen a tender corn or callus so it lifts out without pain.

You reckless men and women who are pestered with corns and who have at least once a week invited an awful death from lockjaw or blood poison are now told by a Cincinnati authority use a drug called freezone, which the moment a few drops are applied to any corn or callus the soreness is reliesed and soon the entire corn or cal-

Freezone dries the moment it is applied, and simply shrivels the corn or cal-lus without inflaming or even irritating the surrounding tiesue or skin. A small bottle of freezone will cost very little at any of the drug stores, but will positively rid o is feet of every hard or and care or hardened callus. If your druggist hasn't any freezone be can get it at any wholesale drug house for you.

Used successfully a whole year all over the South

UCKEYE BLintless Hullshave been fed by farmers, dairy-men and stockmea throu out the South for the past year, Reports riess buils when

ar feeders indicate that these lintle properly fee, are a great improvement over the old style

By actual use, these feeders have found the following advantages of using

The price per pound of real roughage in the form of Buckeye Hulls is very much less than in the form of the old style hulls. Buckeye Hulls do not clog or flux the digestive tract. Other foods mixed with them are readily assimilated.

They are free of trash and dust. They are sacked and easy to handle. They take half as much space in the barn.

If you have not tried Buckeye Hulls, please remember that thousands of feeders are using them and will use no other roughage. If you have not given Buckeye Hulls a fair trial, let the experience of these successful feeders guide you in using them as they should be used.

Mr. Olwey Yarber, Boonsville, Ark., has jed a carload of Buckeye Hulls to cous and colves to get them ready for the range. He had been feed-ing hay and he finds that they did much better on Buck-eye Hulls as roughage. He has another car of Buckeye Hulls bought.

To secure the best results and to develop the ensilage oder, wet the hulls thoroughly twelve hours before funding. It is easy to do this by welting them down night and meening for the next leading. If at any time this cannot be done, wet down at least thirty minutes. If you profer to leed the bulls dry, was only half as much by bulk as at old style hulls. Book of Mixed Feeds Free

Gives the right formula for every combination of feeds used in the South. Tells how much to feed for maintenance, for milk, for fat-tening, for work. Describes Buckeye Hulls and gives directions for using them properly. Send for your copy to the nearest mill.
