Wet Buckeye Hulls carry the feed perfectly

ROUGH-AGE is of little value unless it allows the rougher food to pass through the stomach and be assimilated from it. There is no doubt of this with

BUCKEYE HULLS

when they are wetted down a half hour or so before using. Then they combine more thoroughly and uniformly with the other forage than the old style hulls. Use Buckeye Hulls properly and you will find them a better roughage than old style hulls and far more economical.

Other Advantages

Buckeye Hulls cost much less than old style hulls. They allow better assimilation of food. No trash or dust. No lint.

Mr. E. W. Leonard, Elledale, Tenn.

has been feeding Buckeye Hulls to three milch cows. He says that the cows are giving more milk and butter and are in fine condition. He prefers Buckeye Hulls.

To secure the best results and to develop the smallest odor, wet the hulls thoroughly twelve hours before feeding. It is easy to do this by wetting them down night and morning for the next feeding. If at any time this cannot be done, wet down at least thirty minutes. If you prefer to feed the hulls dry, use only half as much by bulk as at old style hulls.

Book of Mixed Feeds Free

Gives the right formula for every combination of feeds used in the South. Tells how much to feed for maintenance, for milk, for fattening, for work. Describes Buckeye Hulls and gives directions for using them properly. Send for your copy to the nearest mill.
