## Every pound goes much farther

A POUND of old style hulls contains about 1/2 pound of real roughage and about 1/2 pound of lint. After being eaten, the old style

hulls swell to twice the weight, or 1 1/2 pounds. A pound of

**BUCKEYE HULLS**  
LINTLESS

also doubles after being eaten but as they are 100 per cent roughage, the original pound becomes 2 pounds—not 1 1/2 pounds.

Therefore, a pound of Buckeye Hulls goes a third again as far as a pound of old style hulls. In other words, you only have to feed 1/2 pound of Buckeye Hulls to give the same food value as a full pound of old style hulls.

### Other Advantages

Buckeye Hulls cost much less per ton than old style hulls. Buckeye Hulls allow better assimilation of other food.

No trash or dust. Sacked—easy to handle. They mix well with other forage. They take less space in the barn.

Mr. Ben Faulk, Dothan, Ala.,

prefers Buckeye Hulls to old style hulls because cows like them as well, they are cheaper, they agree with the cows, and they go farther, one sack lasting as long as two sacks of the old style.

To secure the best results and to develop the ensilage odor, wet the hulls thoroughly twelve hours before feeding. It is easy to do this by setting them down at night and morning for the next feeding. If at any time this cannot be done, wet down at least thirty minutes. If you prefer to feed the hulls dry, use only half as much by bulk as of old style hulls.

### Book of Mixed Feeds Free

Gives the right formula for every combination of feeds used in the South. Tells how much to feed for maintenance, for milk, for fattening, for work. Describes Buckeye Hulls and gives directions for using them properly. Send for your copy to the nearest mill.
