(By International News Service)

New York, Nov. 2.—American bankers for the first time in history have asked the British government to refrain from sending any more gold to the United States.

The request is understood to be based on the belief that further accumulation of gold would cause a continued rise in the price of necessities and might lead the banks to be lenient in extending credits to borrowers and thus bring about undue credit.

FOURTH NATIONAL TO ISSUE A THIRTY PER CENT DIVIDEND

Hundred Thousand Dollars Locked up for Year to be Given Out Monday.

60 PER CENT COLLECTED

Receiver Hopes to Give Out Another Dividend About the First of the Year, as Collections are Made.

The Receiver of the Fourth National Bank has in his possession the sum of \$97,710 to be distributed next week among the depositors of the Fourth National Bank.

The Fourth National Bank failed about a year ago and the amount to be distributed is the first dividend or 30 per cent.

About 60 per cent of the stock has been collected and there will be other dividends as fast as collections can be made.

The Receiver hopes to pay another dividend the first of the year. Just what the amount will be depends upon the collections, but it is safe to say there will be another dividend in a few months.

This is good news to the depositors and there will doubtless be many people here for their money.

The payment of a hundred thousand dollars that has been locked up for the last year is the best news to be given out except the election of President Wilson which takes place the next day.

Work on New Stein Building Progressing

Stein Brothers' new building on the corner of Gillespie and Hay streets is progressing nicely. The building is to be five stories and when completed will be the finest building in Fayetteville and the Cape Fear section.

The contractor Mr. L. Gentry has completed the brick work on four stories and some idea of its beauty can be formed from what it now is.

The Stein Brothers are the most progressive merchants in the section operating two stores in this city and one in Sanford but when their splendid new building is completed they will have a handsome and larger building in which to better display the high class goods for which the Steins are noted.

They expect to occupy the new building about the first of the year and will doubtless give an opening that will long be remembered in Fayetteville.

First National Does \$1,000,000 Business

The First National Bank did not only the largest business in the history of the bank but did the greatest business ever done by any bank in Fayetteville. Last week, over a million dollar business was done by the bank in six days.

If that isn't evidence of prosperity then we would like to see what prosperity means.

HUGHES MAKES QUICK DASH ACROSS HIS HOME STATE

Replies to Wilson's Buffalo Speech Saying What He Will do if Elected.

(By International News Service)

Albany, Nov. 2.—Charles E. Hughes made a quick dash across his home state today replying vigorously to President Wilson's Buffalo speech in which the President criticized the Republican leaders for making a campaign issue of administrations foreign policy.

"Our opponents do not seem to like the idea of criticism in respect to their international policy. When a matter is so important as the maintenance of American rights it is highly necessary that American opinion should be expressed. I have no apology to make in standing before you and saying that if I am elected President I propose that the American flag shall not only be a symbol of courtesy and justice but it shall be the symbol of firmness and consistency in maintaining our rights on land and sea throughout the world."

Taft's Doctor Gives Recipe for Happiness

(By International News Service)

Chicago, Nov. 2.—The man who made ex-President William H. Taft sinner, Dr. Charles E. Barker of Washington, gave the following recipe for happiness in an address here:

"Look on the bright side of every experience. Accept cheerfully the place in which you find yourself today. Throw your soul into your work. Do as many little kindnesses as possible each day. Maintain child-like attitude of trust in your God.

"The rich, as a class, are the most unhappy people on earth because they think they can buy happiness, like a commodity on the market. Poor people frequently are happy, not because of their poverty, because they have found the laws of happiness.

"Happiness does not depend upon externals at all. It is dependent upon laws that can be learned and obeyed."

HECKLERS QUESTION THE COLONEL AT CLEVELAND

Ask Roosevelt What Course He Would Have Pursued Toward Mexico if President.

(By International News Service)

Cleveland, Nov. 2.—50,000 people cheered Theodore Roosevelt fully five minutes when he opened an attack tonight taking President Wilson's Buffalo address as his text.

Upon Roosevelt's arrival here he was greeted by fifty thousand persons at the station. He was escorted by a torch light procession through the streets that were jammed with people to the central armory. His arrival there was the scene of a great demonstration from ninety thousand people. The Colonel referred to Secretary Baker's comparison of Washington's soldiers with Villa's bandits. Referring to President Wilson, Roosevelt said:

"I want to register my protest against his misuse of the militia and the diplomatic service for partisan advantage. If the President says we are in ignorance of our foreign relations he is bound to enlighten us. If he does not tell us how there must be some reason for it. We have about 150,000 American soldiers on the border but they are not doing anything. Mr. Wilson has put them down there because he cannot make up his mind whether we are at peace or at war."

Several hecklers in the audience created amusement by their questions. Most of them sought information as to what course Roosevelt would have pursued toward Mexico.

Dr. De Forest Plans Music by Wireless

(By International News Service)

New York, Nov. 2.—Dr. Lee De Forest has just given an exhibition here of the wonders of wireless music. Phonograph records were played in a building in West Thirty-eight street and distinctly heard in the receiving room at the Hotel Astor, a quarter of a mile away.

It is possible to send music 150 miles through the air by the De Forest apparatus. The inventor is soon to install a more powerful sending apparatus in the tower of the Woolworth Building, tallest skyscraper in the world, from which concerts will be heard hundreds of miles out to sea. It is feasible for passengers on an ocean liner to hear the organ at the Metropolitan, even to the applause.
