Inhalation in Consumption.

PRONCHITIS, LARYNGITIS, and other Dis-Deases of the Chest and Throat, successfully treated by the Inhalation of Medicated Vapors' and Powders, by absorption and constitutional treatment, as practised at the Stuyvesant Medical Institute, New York City.

The unprecedented success which has attended this method of treating diseases of the Lungs and Throat has induced us to depart from our usual course, and ourselves of the columns of the press, in order to bring it to the knowledge of such as may be laboring under or predisposed to such affections. The dawn of a brighter day has at length arrived for the Consumptive; the doctrine of the incurability of consumption having at length passed away. We have indubi table proofs in our possession that Consumption in all its stages can be cured! in the first, by tubercular absorption; in the second, by the treusformations of the tubercule into chalky and catcareous concretions, in the third by cicatrices, or scars. Those wedded to the opinions of the past may assert, that even now, consumption is incurable, such are behind the age. To all, this great truth must be apparent, viz: that the medicines inhaled in the form of vapor or Powder directly into the Lungs, must be much more effective than that taken into the Stomach, where the disease does not exist, The advantage of Inhalation in Consumption and Throat diseases is, that medicine in the form of Vapor is applied directly to the Lungs, where the disease exists; the stomach is thus left free, to aid in restoring health, by administering to it a healthy, lifegiving food .- There is no case so hopeless that In haration will not reach! The means, too. are brought within the reach of all, the manner of administering the Vapors being so simple that the invalid is ineverrequired to leave home, where the hand of friendship and affection tends so much to aid the physician's effort .

The Inhalation method is southing, safe and ready nd consists in the administration of Liedicine in such a manner, that they are conveyed into the Lungs in the form of vapor and produce deir action at the seat of the disease. Its practical st cess is destined to re-volutionize the opinions of e medical world and establish the entire curability f Consumption. I earnestly appeal to the amon sense of all afflic-ted with Lung diseases, to a brace at once the advan-

tage of Inhalation, and no longer apply medicine to the unoffending stomach. I claim for Inhalation
