#### Apple Pot Pie.

11 pints of flour, one teaspoonful baking ied around a fruit tree at a distance from powder, one cupful sugar, one-half cupful butter, one cupful milk, large pinch salt. Sift flour with powder and salt, rub in butter cold, add milk, mix into dough as for the house fires, and kept moist with water. of Queen Victoria. tea biscuits; with it line shallow stew-pan This mixture makes a complete and perto within two inches of bottom; pour in 11 fect fertilizer, being rich in potash, phoscupfuls water, apples and sugar; wet edges phoric acid and mitrogen, the three prinand cover with rest of dough; put cover cipal elements of plant food, and may be on, set it to boil twenty minutes, then used in the orchard and vegetable garden place in moderate oven until apples are as well as on the farm crops. It is an excooked; then remove from oven, cut top cellent substitute for superphosphate of crust in four equal parts; dish apples, lay lime, so beneficial on nearly all crops. Our on them pieces of side crust cut in diaserve with cream.

#### Preparing A Shoulder Piece.

The shoulder piece of beef can be made into a tender and delicate dish by letting it cook in its own juices in the oven without a particle of water. A stone jar with a tight fitting cover (or a lid of plain dough) will keep in all the flavor and juices, and the tough fibres and gristle are softened by the mild heat. It must be put in three or four hours before dinner time. The heat that comes through the stone is very different from that of hot iron, and it is the slow action of the steady heat that makes a rich dish out of a cheap joint.

Plain Lemon Pie,

To the grated rind and juice of two sprinkle over it two quarts of corn meal His light gray eyes, which resemble more lemons add two cupfuls of cold water, the and a handful of salt. Give this feed at those of his mother's relations at Hesse beaten yolks of two eggs, two cupfuls of morning and night, and the rest of her Darmstadt than his father's, the late Emsugar, and place over the fire. Blend two feed dry at noon, as much as she will eat large tablespoonfuls of corn starch in a clean and no more, and at night give some French call black blue, are losing their vivery little water, and add when boiling, stirring briskly for a few moments, until it will be eaten with relish, and increase the becomes thickened. Pour into a good amount gradually. It helps to give her a undercrust. This amount makes two me- few potatoes cut up and mixed with the dium-sized pies, and may be enriched by dry meal at noon. adding a little butter.

#### The Evils of Overfeeding Hogs.

fail to be beneficial.

ated well repeat it.

Treatment of Hide-bound Cattle.

Striped Cake. Two cupfuls of sugar, two-thirds of a

cupful of butter, two and a half cupfuls of flour, two teaspoonfuls of cream of tartar, for slaughter. Do not feed hogs quite as whites of five eggs, one cupful of milk, one much corn as they will eat, and diversify teaspoonful of soda. Brown part-two their feed as much as possible. If a hog is tablespoonfuls of the white dough, one-half stuffed to repletion with corn, and no othsupful of treacle, one-half cupful of flour, er food is given to it, its appetite will soon one-half cupful each of currants and fail and it will not eat corn with any indiraisins. Bake in layers and spread with cation of relishing it. Vary the food, now jelly.

Soda Biscuit.

One pint of milk, three pints of flour, a pinch of salt, half a cupful of butter and lard mixed, one teaspoonful of soda and two of cream of tartar. Mix soda in the milk and cream of tartar in the flour. Rub Give plenty of good water and a warm, clean bed, separate the quarrelsome hogs from Stephen Coerte Van Voorhees, who O House in Fayetteville, at 12 o'clock, x, I shall
