Most persons believe that owls, cats and other nocturnal animals can see In absolute darkness. This error arise from the fact that in these animals the pupil of the eye is very large or dilatable, and in subdued or very feeble can man. One can readily demonstrate the fallacy of the supposition by tak ing an owl or other nocturnal animal into a perfectly dark room, as we have done, and touching it with the hand. It does not move, even though it be an untamed animal. Cats and other noc turnal animals are erroneously thought to emit light from their eyes because when looking toward the light the eyes at the time of death are handed down from the writings of Pliny and

represent ignorance of the facts of goology. We were once seriously asked by a teacher, "At what age do the little lambs' tails drop off?" He had accu rately observed that the talls of the lambs are long, while those of the old sheep are short, and he had obtained a false idea, which is, however, prevalent. Of course he was shocked to learn that sheep raisers amputate the talls to pre ent the soiling of the wool. -Forest and Stream.
