

GIVE THE POOR BULLY A CHANCE TO FIGHT.

Send Him to the Philippines.
Manda Press.
The man who carries concealed weapons in the ordinary walks of life is either a coward or else he is only awaiting the opportunity to commit some unlawful deed against the best interests of society.

Babies' skin will be soft and smooth if you give them Hollister's Rocky Mountain Tea this month. It regulates the stomach and bowels. It makes the little ones sleep and grow.

Simaruba Bark is an old Creole remedy for Diarrhoea and all bowel disorders, and is a good one. Calais' Simaruba Balm Tonic does the work. It is not a strong astringent, contains no opium or other poisons. It is palatable and effective for children and adults.

CAUSE OF HAY FEVER

Hymeol the Only Cure—Gives Change of Climate in Your Own Home.
Fifty years ago hay fever had not been named. But undoubtedly people suffered then as now with sneezing, watery eyes, excessive running at the nose. The direct causes appear to be heat, dust, and the pollen of flowers, and the only treatment that physicians recommended prior to the discovery of Hymeol, was a change of climate.

Now by using Hymeol you can have an expensive trip to the Mountains, and escape weeks of suffering. This remarkable treatment kills the germs of disease and soothes and heals the irritated mucous membrane. It really gives you in your own home a change of climate, and hay fever sufferers know from past experience that this is the only thing that has afforded them relief.

GASNOW

WHEN MUNICIPAL OWNERSHIP IS DESIRABLE.

As we have had occasion to say before, municipal ownership is a question that has to be decided by each locality according to the conditions prevailing there. If the local government be corrupt or inefficient, the adoption of municipal ownership merely widens the area of plunder or waste. As most of our American cities are corruptly governed, municipal ownership is not good for them.

The subject is well treated by the excellent Collier's, which says in an editorial this week:

"When immediate municipal ownership was the issue before election in Chicago, we were sufficiently scolded for our scepticism over what Mayor Dunne would accomplish under the rule of Chicago statesmen of the old regime. Since those days of promise and high words, the Mayor's programme has altered, and the visit of Mr. Dairymple has further emphasized the political conditions of the Windy Town.

That is the correct condition precedent of municipal ownership, viz: "after political improvement," and Fayetteville is fortunate beyond expression in the political revolution that has caused the amazing result which we have recently witnessed, the election of an incorruptible and efficient board of public works. Think what would be the size of the debt piled up against us if the municipal light business had been continued at the same rate of loss as that sustained in the two years during which the city has been trying the municipal ownership of lighting!

Collier's, in another article, gives the result of municipal ownership in a great English city, where the government is both honest and capable, as follows:

A BRITISH EXPERIENCE.
The annual report of the municipal tramway system of Manchester, transmitted by Consul Hamm of Hull, shows that for the year ending March 31, 1905, the city cleared a net profit of \$664,750 on the 145 miles of track in operation. The great bulk of the business—77.34 per cent of the whole—was done at a cent fare or less. The city has been able to run its lines with profit at these rates while reducing the working hours of its employees from seventy to fifty-four per week. At the same time it gives each of its workers free uniforms and a week's annual vacation with pay.

During those hours of the day, morning and evening, when working people ride, the fares in Manchester are a cent per passenger for any distance. And what splendid service it is! No jolts, like the vile New York street cars at 5 cents per passenger, but so smooth running that the passenger is hardly aware of motion. No hanging by straps, flung hither and thither by the motion of the rattle cars and track, but every passenger seated. No dust or dust-covered windows that rattle in their cases; but clean, pure air and spotless plate glass windows. No bullying conductors that hold you up for your fare like a highwayman; but courteous fare collectors whose only object seems to be to make the patrons of the road feel comfortable in mind and body.

Now, what is the cause of this vast difference in the outcome in the Democracy of England and the Democracy (so-called) of America? That is the great question to which all patriots must address themselves, or the beginning of the end of our republic is at hand. Fortunately, the anti-graft wave, now sweeping over the land, gives us hope.

FAYETTEVILLE'S RELATION TO THE SUBJECT.
The Virginia papers are filled with the bitter imprecations of the aroused people upon the corrupt primary system there. This experience—which is but that of nearly all the municipalities in America—should admonish us here in Fayetteville that "eternal vigilance is the price of liberty."

only necessary to recall the fact that, at the election in May, qualified voters were refused the right to vote because their names were not on a so-called registration list. This may properly be called an arbitrary registration list because it contained the names of other qualified voters who have informed us that their relation to the registration list in question was precisely the same as that of the excluded voters.

As we took occasion to say at the time, this corrupt act was, we were assured, the mere overlooked survival of the old Ring method, whose momentum could not be checked at every point at once. But the occurrence, going to the very root of government and turning it into the most complete of despotisms, that of the Ring and the Boss, must warn us to see to it that such an outrage cannot happen again; but that our great fundamental right of representation where taxation exists shall be preserved in its pristine purity.

When that blessed condition is restored to us—the condition for whose establishment our Revolutionary fathers fought—then, indeed, will we be prepared to consider the great question of municipal ownership—or, as Collier's puts it: "it can only succeed after political improvement!"

A BIG AND BEAUTIFUL FAYETTEVILLE.
It should be the aim of every patriotic citizen of this town to make a big and beautiful Fayetteville. Nature has been lavish in her favors to us, and the prosperity, nay, the eminence of the town in former days, attests this fact.

But the indispensable condition of accomplishing such an aim is a candid recognition of our own shortcomings. Whether it was the stigma of repudiation, attaching to us alone of Carolinian municipalities, which crushed the aspirations of our high-minded citizens, or the virus of that costly act which gave us for so long a reckless and despotic government, we must resolutely determine to efface the one and expel the other. If it was this handicap which caused the town to fall from its former high estate, while back country villages became prosperous cities, its removal will set Nature free again.

RUSSIA WANTS PUBLICITY AT PORTSMOUTH, BUT SUPPRESSES IT IN RUSSIA.
The subjoined editorial from the Baltimore Sun is interesting because it well states the Russian side of the proposition that the proceedings of the conference at Portsmouth be public.

SAYS THE SUN:
M. Witte, the chief plenipotentiary for Russia in the conference at Portsmouth, is quoted in an interview as protesting almost passionately against the secrecy which he is compelled to observe about the proceedings of the conference. There has been as yet no official and authoritative statement concerning the note in which the Japanese plenipotentiaries laid before the Russian envoys the terms on which Japan is prepared to make peace.

According to Russki Invalid, a Russian official gazette, the Japanese army in the field in Manchuria consists of 10 divisions and 22 reserve brigades. The number of battalions is between 388 and 404, making from 430,000 to 450,000 bayonets. The country especially of local political affairs." Mr. Jerome feels that this is the appropriate time to make the test.

A Touching Story
is the saving from death of the baby girl of Geo. A. Eyles, Cumberland, Md. He writes: "At the age of 11 months, my little girl was in declining health, with serious Throat Trouble, and two physicians gave her up. We were almost in despair, when we resolved to try Dr. King's New Discovery for Consumption, Coughs and Colds. The first bottle gave relief; after taking four bottles she was cured, and is now in perfect health."

DeWitt's Witch Hazel. No remedy effects such speedy relief. It draws out inflammation, soothes, cools and heals all cuts, burns and bruises. A sure cure for Piles and skin diseases. DeWitt's is the only genuine Witch Hazel Salve. Beware of counterfeits, they are dangerous. Sold by King Drug Co.

A WELL CONSIDERED VIEW OF THE PEACE NEGOTIATIONS.

Says the Atlanta Journal:
M. Witte, the Russian peace plenipotentiary, is reported to be extremely pessimistic as to the peace outlook. Japan has demanded not only the cession of Sakhalin Island, but sufficient money indemnity to reimburse her for the cost of the war, which is about \$700,000,000 up to date—although the Japanese representatives have been careful not to call it an indemnity. These two claims have been regarded by the Russians as excessive. It is intimated that they would be quite willing to yield to the other terms—the cession of the lease of Port Arthur and Dairen and the remainder of the Liao-Tung peninsula; the evacuation of Manchuria; the cession to Japan of the Chinese Eastern railroad south of Harbin; the recognition of the Japanese protectorate over Korea; the grant of fishing rights in Siberian waters, and several other demands—or if not to yield them to at least accept them as a basis for discussion; but that they are not willing to grant both the large indemnity and the possession of Sakhalin. It is opinion of him is that he is a plain, blunt, outspoken man who wants to get Russia's case before the world without concealment of anything.

Jerome and the Bosses.
The defiance of District Attorney Jerome of New York county, in his war against graft and political corruption, has assumed new shape, and passed the bounds of previous limitation. After having placed himself before the country by his struggle against evil in New York city and New York county, Mr. Jerome now declares that he will stand for re-election in the coming campaign, and will disregard the "bosses and political machinery" which generally, according to the district attorney, has held previous elections under its control.

THE JAP FIELD FORCE.
According to Russki Invalid, a Russian official gazette, the Japanese army in the field in Manchuria consists of 10 divisions and 22 reserve brigades. The number of battalions is between 388 and 404, making from 430,000 to 450,000 bayonets. The country especially of local political affairs." Mr. Jerome feels that this is the appropriate time to make the test.

A HIGH CALLING.
The editor is the representative of the people. He is as much their representative as if he had been elected to the office of editor by the votes of the people. Any conception of his office less than this is too low. And yet—There are newspaper editors—happily they are rare—who will tell you (privately) that a newspaper has as much right, morally, to champion the cause of some special and selfish interest for pay as a lawyer has to plead the cause of his client for a fee.

Peculiar Disappearance.
J. D. Runyan, of Butlerville, O., laid the peculiar disappearance of his painful symptoms, of indigestion and biliousness, to Dr. King's New Life Pills. He says: "They are a perfect remedy for dizziness, sour stomach, headache, constipation, etc."

Fiendish Suffering
is often caused by sores, ulcers and cancers, that eat away your skin. Wm. Bedell, of Flat Rock, Mich., says: "I have used Bucklen's Arnica Salve, for Ulcers, Sores and Cancers. It is the best healing dressing I ever found. Soothes and heals cuts, burns and galls." 25c. at B. E. Sedberry's Sons Drug Store, guaranteed.

Don't wait until your blood is impoverished and you are sick and ailing, but take Hollister's Rocky Mountain Tea. It will positively drive out all impurities. 35 cents, Tea or Tablets. McDuffie Drug Store. (Franklin & Martin.)

IS CHINA AWAKENING?

The man who talks or walks in his sleep is not, per se, a very dangerous or a very potential factor. But somnolent activity may, perhaps, be taken as indicative of emergence from the stage of slumber, snoring slumber and that he may be expected within a reasonably short time to arouse fully and exert all his normal faculties. Such is the position of China.

China's brush with Japan ten years ago did something toward this end. Her sad experience with Russia and other diplomacy has also partaken of very decided reawakening power. It is doubtful, though, if the influence of either incident were far below the more intelligent classes, until the natives found themselves in the position of the Russian masses—taxed heavily to meet indemnities the meaning of which they did not understand.

A HIGH CALLING.

SALMAGUNDIS COMM.

CAMERON, N. C., Aug. 12, 1905.
MR. EDITOR—We thank Lex for the information he has imparted to the public; hope it will do them good. Several years ago, some scribble referred to Brick Pomeroy, of the Lacroce Democrat, and said he was a one-eyed man, hoping to provoke a duel. But Pomeroy simply retorted, another man knows us, and all important matters ought to be given publicity.

China's brush with Japan ten years ago did something toward this end. Her sad experience with Russia and other diplomacy has also partaken of very decided reawakening power. It is doubtful, though, if the influence of either incident were far below the more intelligent classes, until the natives found themselves in the position of the Russian masses—taxed heavily to meet indemnities the meaning of which they did not understand.
