Just before he went on the stage he passed the colored principal, of the school behind the curtain, whose look of mingled flurry and importance convinced him that a formal introduction was impending-and a few minutes afterwards it came, "My young friends," said the prin-

### Weak Hearts

Ar, due to indigestion. Ninety-nine of every one hundred people who have heart trouble can remember when it was simple indigestion. It is a scientific fact that all cases of heart disease, not organic, are not only traceable to, but are the direct result of indigestion. All food taken into the stomach which fails of perfect digestion forments and swells the stomach, puffing it up against the heart. This interferes with the action of the heart, and in the course of time that dalicate but vital organ becomes diseased.

DISINFECTION. IMPORTANT. Results Obtained in a Large Institution

The importance of disinfection is shown

the results obtained at the Brooklyn Home for Consumptives, the finest institu-tion of the kind in New York. A letter from the President is quoted:

"We have used Platt's Chlorides in the Brooklyn Home for Consumptives for more than ten years, and find it not only a comfort but a necessity. Through its use we defy the germs' to make any inroads on the nurses and employees who are in constant attendance upon the sick, one hundred of whom are now in the institution. One nurse has been there well on to ten years, a second almost as long, and not one person ever employed in the Home has de-veloped lung trouble."—Mrs. S. V. White.
