

The State Normal and Industrial College. We desire to call attention to the advertisement of the State Normal and Industrial College which appears in this issue. Every year there is a steady growth in this great institution devoted to the higher education of the women of North Carolina. The Melver Memorial Building provision for which was made by the last General Assembly, is now in course of erection and will be ready for occupancy at the opening of the fall term. The college last year had a total enrollment of 550 students. Ninety-two counties were represented. Nineteen-tenths of all graduates of this institution have taught in the schools of North Carolina. The college dormitories are furnished by the State and board is provided at actual cost. Two hundred appointments to the dormitories, apportioned among the several counties according to population, will be awarded to applicants about the middle of July. Students who may wish to secure one of these appointments should make application before July 15th.

PICNIC AT STEDMAN.

A picnic dinner, birthday celebration, family reunion and a prohibition rally—a quadruple of good things—brought quite a gathering to the home of Mr. W. A. Beard on Turnall, Saturday, the 21st of May. And such a feast of good things—good eating quantity unlimited, good company of all ages, fine speeches by both laymen and ministers. Who could not enjoy such things and wish every day was like this?

The occasion was the 90th birthday of one of Bladen county's most worthy citizens, Mr. Owen J. Gardner. Mr. Gardner has a very enviable record as a citizen and Christian gentleman. He was born May 23rd, 1828, became a Christian and a member of the Methodist church in 1849, and has been noted since as a religious leader. For fifty years he was a singing master and taught several generations the rudiments of music. He married Miss Marrion Edge Oct. 17th, 1860. Of this union were born five living children, 24 grand-children and five great grand-children.

Responding to the call of duty and the defense of his country, he enlisted Aug. 1862, in Company H, 36th Regiment North Carolina Troops, in which he remained until the last battle fought there was given him the honorable discharge. Then he returned home to resume the care of his family and the upbuilding of his community.

To be in the company of Mr. Gardner and to know his life history is an inspiration; to hear the story of his experience and to know what he accomplished for his community's good is indeed quite encouraging. For these, if no other, reasons, it is a privilege with us to be present at a picnic with him. The picnic at this time was made especially pleasant by the following programme:

1. Singing.
2. Speech on Prohibition, by Rev. E. B. Craven.
3. Paper on Appreciation of Mr. Gardner, read by Rev. Mr. Britt.
4. Prayer, by Rev. N. M. McDonald.
5. Dinner, Picnic Fashion.
6. Speech on Prohibition, by Mr. Newton.
7. Speech on Prohibition by Mr. Tolar.

The two last mentioned gentlemen are from Fayetteville.

The paper read by Mr. Britt was as follows:

"There is a great hunger in the world for expressions of appreciation; and the world would be vastly happier if the affection resting between parents and children, husbands and wives, pastors and people, and teachers and pupils, was more often and more fully expressed. The sweetest perfume the home circle ever knows rises from deeds of loving service done by its members for each other. To illustrate: In Crockett's charming little parable, 'The Plac-Actress,' a man who had heard a sermon thanked the preacher for every good word he spoke. He was the great society of encouragers that makes the world go round."

Mary broke the alabaster box on that living Christ. She did not wait till he was dead before she told him thus of her friendship and love.

A curious writer says don't keep the alabaster boxes of love and tenderness sealed up till your friends are dead. Fill their hearts with gladness; speak approving cheering words while their hearts are yet in the flesh.

If my friends have alabaster boxes of the fragrant perfume of sympathy and affection laid away which they intend to break over my body, I would rather they were broken out on me now than when I am dead.

I would rather have a plain coffin without a flower, a funeral without a eulogy, than life without the sweetest of love and sympathy.

Flowers on the coffin cast
A fragrance backward on the weary road
What use for the rope if it be not hung
Till the swimmer's grasp to the rock is clung
What help in a comrade's bugle blast,
When the peril of Alpine heights is past
What worth is eulogies' blandest breath
When whispered in ears that are hushed in death?
No! if you have but a word of cheer,
Speak it while I'm alive to hear.

The programme being completed, the gathering separated, each having a heart full of cheer and inspiration. May there be the return of many such days to the comfort and happiness of Mr. Gardner, and may all the undertakings of those he loves be as honorable and successful as his own life.

N. M. McDONALD.

"Health Coffee" is really the closest Coffee imitation ever produced. This clever Coffee Substitute was recently produced by Dr. Shoop of Bladen, Wis. Not a grain of real Coffee is in it. Dr. Shoop's Health Coffee is made from pure toasted grains, with malt, nuts, etc. Really it would fool an expert—who might drink it for Coffee. No 10 or 30 minutes tedious boiling. "Made in a minute" says the doctor. Sold by L. C. Woolen.

NO HUMBING.

No humbug claims have to be made for Foley's Kidney and Bladder Remedy for coughs, colds and lung troubles. The fact that more bottles of Foley's Kidney and Bladder Remedy are sold than any other cough remedy is the best testimony of its great merit. Why take sickening and unwholesome remedies when Foley's Kidney and Bladder Remedy is so safe and so sure? Dr. Shoop's Health Coffee and Dr. Shoop's Kidney and Bladder Remedy. Dr. Shoop's Health Coffee (O. O. Souders, Prop.).

YOU SHOULD KNOW THIS.

Foley's Kidney Remedy will cure any case of kidney or bladder trouble that is not beyond the reach of medicine. No medicine can do more. Medical course won't bring you back to full health in a day or two, but it will do enough in 48 hours to satisfy you that the remedy is reaching that "tired spot". Druggists everywhere are advising its use as a splendid and prompt general tonic. It gives more vim and more spirit to the spine than any other known nerve or constitutional tonic. It sharpens a failing appetite, aids digestion, drives sluggish livers and kidneys, and brings new life, strength and ambition. Test it a few days and be convinced. B. E. Sedberry's Son.

DEWITT'S KIDNEY PILLS.

It is especially good for piles. Be sure to get DEWITT'S Sold by Arnfield Drug Co.

DR. J. F. HIGHSMITH ELECTED PRESIDENT.

Of the State Medical Society.

The North Carolina Medical Society in session at Winston-Salem, this morning elected Dr. Jacob P. Highsmith, of this city, President of this Society. Another signal honor was conferred on him also, last week, by his election as President of the Jefferson Medical College Alumni.

These honors are great, but they were well bestowed, and Fayetteville is proud of the fact. Dr. Highsmith is recognized, at home and abroad, as one of the ablest physicians in the South. He retired a year ago from general practice and is now devoting himself entirely to his splendid hospital here and consultation work.

"Jacob Franklin Highsmith was born in the county of Sampson, North Carolina, on the 1st day of September, 1848; his father being John A. Highsmith, and his mother Mary Ann Highsmith, John Highsmith's calling being that of a farmer."

"The early life of Jacob Highsmith, a lad of strong, vigorous physique, was passed in the country, where his parents, though well-to-do, daily impressed upon him the virtue and necessity of industry, and he was not exempt from the manual labor of the farmer."

"Given the average opportunities of instruction in the private schools of

the neighborhood and county, young Highsmith's mind early turned to the profession for which he afterward equipped himself. In truth, almost from his childhood he instinctively turned from the theoretical view of education. He wanted to learn, because he could do something, accomplish something. Driving the mules to water or feeding the stock, the thoughtful lad was communing with nature, watching its life and death, its springing up and dying down. He himself believes that the resolution was implanted in his mind to become a physician on the day when, crossing a field, he found a sheep which had accidentally been staked and disemboweled. His heart was touched and his mind stirred to give relief. With a needle and thread he sewed up the

RAILROADS AND WOOD PRESERVATION.

The recent action by the board of directors of the American Railway Association and Maintenance of Way Association in appointing a committee of seventeen to investigate and report upon the subject of wood preservation has shown that the practical railroad men of the country recognize the importance of taking steps to conserve the rapidly diminishing timber supply of the United States.

Timber is one of the principal materials purchased by the railroads and its economical use is a subject of far-reaching importance. More than 100,000,000 crores are used annually by the different railroad companies, and their average life in this country is not more than six or seven years. From a statistical point of view, it is the knowledge of wood preservation under conditions in this country, timber testing engineers say it is reasonably certain that an average life of from 15 to 20 years may be secured by treating the wood with good preservative and the use of improved devices for the prevention of mechanical abrasion, thus to a large degree diminishing the drain upon the timber supply.

While the quantity of timber used for ties is very great and the problem of a future supply is a serious one, yet this class of timber is not the only one which should receive consideration. A greater length of service from timber now used by railroads for bridges, trestles, piles, fences, and transmission poles is greatly to be desired.

A. F. Kuehn, Engineer of Track and Roadway, Cleveland, Cincinnati, Chicago & St. Louis Railway is chairman of this special wood preservation committee and C. G. Crawford, specialist in wood preservation, United States Forest Service, is its vice chairman. The first meeting was held in Chicago on the 24th of last month for the purpose of organizing and deciding upon a plan of work. The committee was divided into four sub-committees to take up the following lines of work: Statistics and Economics, O. Chauncey, Consulting Engineer, Chicago, Illinois, Chairman.

Preservatives and Specifications, H. von Schrenk, Consulting Timber Engineer, St. Louis, Missouri, Chairman.

Adaptability of Woods and their Preparation, W. K. Hatt, Civil Engineer, Forest Service, Lafayette, Indiana, Chairman.

Treating Processes, C. G. Crawford, Specialist in Wood Preservation, Forest Service, Washington, D. C., Chairman.

This American Railway Engineering and Maintenance of Way Association now consists of about 900 members representing 200,000 miles of railroad track and including among its members the leading railroad engineers of the country. The object of the association is the advancement of knowledge pertaining to the scientific and economical construction, operation and maintenance of railroads. It has employed to obtain this information is through standing committees appointed by a board of directors. Each committee is appointed to investigate a special subject and to report its findings to the association.

Under the supervision of their respective committees, which are published in "The Manual of Recommended Practice," after they have been adopted by the association.

ITEMS FROM STEDMAN.

Dr. J. F. Highsmith is now the sole proprietor and general superintendent of the Highsmith Hospital (its present name) and the Cochran Annex. The institution, under his direction and supervision, has recently been fully beautified and improved on the exterior and interior.

Dr. R. B. Strickland, of High Point, is visiting his sister, Mrs. A. C. Ballard, and other relatives here.

Miss Gertrude Corbet, of Ivanhoe, is visiting relatives in Stedman.

Mrs. Jonathan Averitt, who was quite ill during last week, has almost recovered.

Dr. T. C. Bullock took his brother, Mr. George Bullock, up to the hospital in Fayetteville for treatment last week.

Mr. David Seasons went down to Wilmington on Monday afternoon to spend a day or two during the Tournameant.

Mrs. W. B. Maxwell, who has been visiting in Wilmington with her two little girls, will return home to-day or to-morrow.

Miss Emphie Autry spent last Sunday in Antriville.

There were 132 applicants, of which number 93 were granted license by examination and 10 by reciprocity. There were 29 who failed to secure license.

As will be seen in another column, Dr. J. F. Highsmith, of this city, was elected president of the Society at 11 o'clock this morning.

The death roll for the past year includes three ex-presidents of the State organization, those being: Dr. P. T. Murphy, superintendent of the State Hospital at Morganton; Dr. Joseph Graham, of Charlotte; and Dr. T. D. Light, of Fayetteville; J. D. McMillan, Lumberton; Randolph Vamp, Lumberton; W. Harper, Dunn; H. A. McSwain, Wade.

Lived in Four Counties, But Moved Only Once.

W. E. Murchison, Esq., of Jonesboro, who has been here for several weeks undergoing treatment at the hospital, enjoys the unique distinction of having lived in four different counties, and yet moved his residence only once.

"That seems a puzzle, but it is quite simple. He was born and reared in Cumberland, and when Harriet was created out of Cumberland, he found himself in Harrett. Afterwards he moved to Moore county, and when the county of Lee was formed a few months ago, he found that he was residing in Lee."

Dr. Shoop's Little Early Risers, the famous little liver pills, are sold by Arnfield Drug Co.

If one feels dull and spiritless, in the spring or early summer, it is called "Spring Fever". But there is no fever—usually. It is the after effect of our winter habits. The nerves are mostly at fault. Tired, worn-out nerves leave us languid, lifeless, and without spirit or ambition. A few doses of Dr. Shoop's Restorative will absolutely and quickly change all of these depressing symptoms. The Restorative course won't bring you back to full health in a day or two, but it will do enough in 48 hours to satisfy you that the remedy is reaching that "tired spot". Druggists everywhere are advising its use as a splendid and prompt general tonic. It gives more vim and more spirit to the spine than any other known nerve or constitutional tonic. It sharpens a failing appetite, aids digestion, drives sluggish livers and kidneys, and brings new life, strength and ambition. Test it a few days and be convinced. B. E. Sedberry's Son.

"Lester M. Nelson, of Naples, Maine, writes in a recent letter: 'I have used Dr. Shoop's New Discovery many years, for coughs and colds, and I think it saved my life. I have found it a reliable remedy for throat and lung complaints, and would not be without a bottle in my house.'"

For nearly forty years Dr. Shoop's New Discovery has stood at the head of throat and lung remedies. As a preventive of pneumonia, and healer of weak lungs, it has no equal. Sold under guarantee at B. E. Sedberry's Son's drug store, 56c and \$1.00. Trial bottle free.

Mrs. S. L. Bowen, of Wayne, W. Va., writes: 'I was a sufferer from kidney disease, so that at times I could not get out of bed, and when I did I could not stand straight. I took Dr. Shoop's Kidney Remedy. One dollar bottle and part of the second cure me entirely. Foley's Kidney Remedy works wonders where others are a total failure. Medulle Drug Store (O. O. Souders, Prop.).'
