Are You Chankful, Too, This THANKSGIVING?

Last Thanksgiving we published many (hands of safe, sane and conservative reasons from many people why they men, were thankful,

But what's the use this Thanksgiving? We all know some of the reasons why we should be thankful.

We are thankful that the new steam road is to be built and that the electric road will soon be under way. Both these great enterprises will put tens of thousands of dollars in circulation in Henderson county.

We are thankful that the farmers have Then ask the new people here had good crops and that the thousands of dollars sent out of the county for feed stuff last winter will remain at home

We are thankful that the financial cloud hovering over other parts of this country has not settled down in Henderson, and we are heartily thankful But what good does it do us to that our banking institutions are in the

physical well-being of the community. We are thankful that the poles are out of Main street and that they won't go back, leaving the finest street in the

world free from obstructions. We are thankful for the blue skies, the warm sun and the health-laden breeze and this wonderful climate which

restores the ill and keeps the well strong. We are thankful for so many things we just can't think of them all, so what's the use of going around and asking people what they're thankful for?

So far as the Hustler is concerned it's thankful for an increased and quite healthy circulation, thank you mam, for a good business, for bright prospects, and the confidence of its home folks. So there, now!
