

## COOK IN COMFORT THIS SUMMER

YOU can make your kitchen as livable as your living room—if you have a NEW PERFECTION Oil Cookstove. No wood-box, no ash-pan, no coal-hod to bother with. A clean, cool kitchen, and half the drudgery gone. The NEW PERFECTION is quick and handy like a gas stove. It lights instantly, and gives you a big volume of heat, easily regulated just by raising or lowering the wick. It is easy to operate, easy to clean, and easy to re-wick. 2,000,000 women say it's "gas stove comfort with kerosene oil."

Ask your dealer to show you his NEW PERFECTION line—stoves with one, two, three and four burners. Note particularly NEW PERFECTION OVENS, especially made for use on these stoves. Ideal for roasting and baking.

Use Aladdin Security Oil or Diamond White Oil to obtain the best results in oil Stoves, Heaters and Lamps.

### TRACTION CO. SCHEDULE.

Cars to Run Every 30 Minutes With Competent Motorman; on Sundays Every 15 Minutes.

The cars of the Hendersonville Traction Company are now running on schedule time. Every train will be met promptly and the service for the public of 30 minute trips will be the regular order for the season.

The Hendersonville Traction Company, under the present and new management, purposes to give able and efficient service and render satisfaction not only to the summer visitors but the townspeople.

Mr. Marion McEachern, who is said to be an able and competent motorman and mechanic will run the car. He has had ample experience in which to demonstrate that he knows thoroughly the mechanism of the car.

Leaving Columbia Park at 7:30 a. m. each morning, the cars will operate on a 30 minute schedule, leaving the depot on the hour and Columbia park on the half hour. The last car will leave the depot at 9 p. m. This schedule is for week days only. On Sundays the cars will run every 15 minutes. As soon as there is an increase in traffic, this schedule will be subject to change.

### IMPORTANT!

The Colorado potato beetles or what we commonly call "potato bugs" are appearing in large numbers in several different sections of Henderson county. The potato beetle does thousands of dollars worth of damage to the potatoes of the South each year, and from the start they are making here this year many crops will be lost if something is not done at once.

The potato beetle is one of the easiest of the insects to control. It has chewing mouth parts and can be killed by use of a stomach poison such as Paris green or arsenate of lead, applied when they are eating the potato vines.

The best way to apply these poisons is with a spray pump. However, if you have no pump you can dust the material on the vines. If the spray pump is used you should use the following mixture: Bordour mixture (4 lbs blue stone, 4 lbs stone or caustic lime to fifty gallons water and add 3 lbs. paste arsenate of lead or 1.1-2 lbs powdered arsenate of lead.) If you have no pump the following may be applied: 1 part Paris green, well mixed with 20 parts slacked lime and dusted on the vines while dew is on. By the use of a hemp sack or sack made of cheese cloth the latter is considered better.

### ANTI-TYPHOID CAMPAIGN TO BEGIN IN HENDERSON COUNTY.

Three Treatments Given Each Patient Without Cost; Begin About June 21; Reduce Typhoid Fever.

The anti-typhoid campaign in Henderson county will begin about June 21.

The plan is to hold a free public anti-typhoid treatment dispensary in about six different parts of the county and visit each one of these points once a week in turn. Three treatments against typhoid are required to immunize. These treatments are given a week apart.

While the treatment will be given absolutely free, a small share of the expense for such a campaign will be borne by the county, and the remainder by the State. The value of such an offer will be readily seen when it is remembered that the usual charge for such treatment or immunization ranges from 75c to \$3.00.

The first five counties in the State to hold co-operative anti-typhoid campaigns with the State Board of Health have just been selected. They are Wake, Northampton, Cumberland, Henderson and Buncombe. These were the first counties to volunteer active, vigorous co-operation in the matter. Wake county heads the list with an appropriation of \$500; Northampton is second with \$400; Cumberland third with \$350; Buncombe and Henderson follow with \$300 each. This money will be used to pay in part the salaries and traveling expenses of the physicians in charge. The State Board of Health will furnish free anti-typhoid vaccine, literature, placards, posters, and traveling anti-typhoid exhibit, together with exhibit material on flies, and other public health subjects. These campaigns will start in all five counties on June 21.

It is expected from the results obtained in previous years, that 5,000 people or more in each of these counties will avail themselves of this free opportunity to protect themselves against typhoid. This in turn will greatly reduce the typhoid rate in these counties.

The efficiency of the anti-typhoid treatment is no longer doubted. In our army the case rate per 100,000 soldiers has been reduced from 536 before the discovery of anti-typhoid vaccine to 232 when its use was optional and to three when its use was made compulsory. In other words it has decreased to about one-half per cent. of what it was before vaccination was begun.

### EDITOR WOLFE SEEKS HEALTH.

Mr. Charles W. Wolfe, editor of the County Record, was taken to Hendersonville, N. C., Friday morning, where he was placed in a sanitarium for treatment. Mr. Wolfe has been in bad health for several years, but recently pulmonary troubles developed and his physicians advised a change of climate.—Kingtree, S. C., correspondent to Charleston News & Courier.

### NORTH CAROLINA FRUIT CROP ONLY 4TH PER CENT THIS YEAR.

Bloom Blight, Hail Storms and Wind Have Reduced the Crop in Western Carolina; Fruit Statistics.

The fruit crop in North Carolina will be only forty per cent normal, according to figures compiled by State Horticulturist W. N. Hunt from six hundred reports through the Mountain, Piedmont, Coastal and Sandhill sections of North Carolina. The cause of the shortage in the crop for this year appears to be the pear blight general not only through North Carolina but other States in the South. Virginia, West Virginia, Maryland, Pennsylvania, Delaware, Tennessee, as well as this State the crop will vary in crop reduction from fifty to seventy-five per cent on account of the pear blight.

At blossom time there was every indication for a normal crop of apples this season of the varieties which did not bear full crops last season and which do not tend to alternate but at the present date there will only be about 40 per cent of the normal crop according to the averages of the estimates of our crop reporters throughout the State. The cause of the shortness of this year's crop is due almost entirely to the ravages of pear or blossom blight, a bacterial disease which destroys the blossoms, young fruit and young growth of both apple and pears. The mountain counties report some early damage from hail storms and wind.

The pear crop will be short this year due mainly to the severity of the blight. The average of the reports shows that pears will produce 47 per cent of the full crop.

Peaches and grapes are expected to produce almost a normal crop in all sections of the State except in the sand hills where there was a heavy drop.

Owing to the different conditions which influence the fruit crop in the different sections of the State it was considerable advisable to group the reports under four divisions:

#### Mountain Section.

Apples—36 per cent of full crop.  
 Pears—43 per cent of full crop.  
 Peaches—70 per cent of full crop.  
 Grapes—80 per cent of full crop.

#### Piedmont Section.

Apples—48 per cent of full crop.  
 Pears—55 per cent of full crop.  
 Peaches—80 per cent of full crop.  
 Grapes—82 per cent of full crop.

#### Coastal Section.

Apples—59 per cent of full crop.  
 Pears—33 per cent of full crop.  
 Peaches—71 per cent of full crop.  
 Grapes—80 per cent of full crop.

#### Sand Hill Section.

Apples—60 per cent of full crop.  
 Pears—40 per cent of full crop.  
 Peaches—65 per cent of full crop.  
 Grapes—90 per cent of full crop.
