Tired and Nervous

It is easy to tell when your nerve-force and vital power are slipping away from you. When your day's work leaves you weary and exhausted; when you are so nervous, irritable and restless that your nights are passed in restless tossing; when you get up in the morning with no appetite for breakfast, and go around all day with a headache; you may be sure your nervous strength is being used up faster than it is being renewed.

"My nervous system having been greatly impaired by overwork I suffered a great deal from nervousness and a tired, worn-out feeling. I would be so exhausted after delivering a sermon that it would require a day or two to recover. After taking a few doses of Dr. Miles' Nervine all that disappeared. I could go to sleep at night and awake in the morning feeling rested and refreshed. It is a great remedy."
