## Motherhood

THIS event in the life of a woman is looked forward to with a feeling akin to horror—not because the little one is not welcome, but because the mother dreads the direful consequences to herself. Those long hours of agonizing labor stand out before her like a hideous nightmare. An improper delivery, followed by child-bed fever, may end the scene in a few short days, leaving the little one motherless. But there is another side to the picture. If women who are expecting to become mothers will commence the use of the greatest female tonic, regularly as directed a few weeks before confinement, and continue its use until the organs are restored to their normal condition, the hours of labor will be shortened, the pain lessened, and recovery complete.

Send for our new book, "Healthy Mothers Make Happy Homes," which contains much valuable information regarding pregnancy and motherhood. It is free.
