

For Congressman, JOHN G. GRANT of Hen-
rson, nominated by acclamation.

RESOLUTIONS

The republicans of the Tenth district of North Carolina, in convention assembled, resolve as follows:

We reaffirm our allegiance and devotion to the principles of the national republican party.

That we congratulate the country on its progress and prosperity under republican rule, showing that the policies of the republican party have brought prosperity to the nation.

That we cordially commend the zeal and sincerity of President Taft in his efforts to enact into law the promises of our national platform.

That we endorse the course of our representative in congress, Hon. John G. Grant, and recognize in him an efficient public servant and we hereby pledge ourselves to do all in our power to secure his reelection.

WOOD AIRSHIPS TO CROSS ATLANTIC IN 48 HOURS.

German Plans to Utilize Trade Winds With Power.

William Rettig of Berlin is completing an airship he says will make the trip from America to Europe in forty-eight hours. It is 420 1/2 feet long, 45.9 feet beam and traveling at an altitude of 3,000 feet will carry thirty passengers.

Herr Rettig, instead of being a visionary, is a distinguished architect, engineer and scientist.

Furthermore, Herr Rettig is negotiating with an American company to construct several airships, the company intending to organize a superatlantic airship line on a strictly business basis. Herr Rettig said:

"Reckoning that the trade winds— which, it is established, blow across the Atlantic at a height of 3,000 feet— have a speed of thirty miles an hour (which is not uncommon) and calculating that my airship's speed will increase the pace at least thirty miles an hour, as it will, my ship will easily traverse the distance from the American to the European coast in about forty-eight hours."

"Wooden airship" sounds fanciful, and when the aeronautical experts first heard of Herr Rettig's invention they shook their heads almost sadly.

It happens that Rettig knows what he is talking about. He is an expert in woods. There is scarcely any test of the resisting power, weight and other qualities of the woods most used that he has not made.

He is building his airship of Canadian fir, and he declares that 2,000 times as much gas escapes through the stuffs that balloons are made of now as leaks through fir wood. Besides, the fir is very light and immensely strong.

"I shall carry about thirty passengers from America and about fifteen from Europe," he said.

"Of course there will be proper sleeping accommodations."

SWISS BUILD WONDER BRIDGE

Over Two Hundred Feet High and a Thousand in Length.

Switzerland today has in the process of construction a railway bridge which when finished will prove one of the most stupendous feats of engineering skill in the world.

The bridge is being constructed across the Weisbach and is a part of the new Swiss railway line connecting Toggenburg with Lake Constance. It is over 200 feet in height and 1,000 feet in length, but these figures do not convey an idea of the stupendousness of this immense structure.

Tremendous obstacles have had to be overcome in constructing the railway, including the building of eight other viaducts totalling a mile in length, besides several tunnels that have had to be cut through the solid rock. The entire line is only twenty miles long.

The herculean task of building the Weisbach bridge, however, causes all the other constructions of the line to pale into insignificance. It is a tremendous structure built upon pyramidal columns, which appear like giant sectioned legs of some curious crawling insect as one stands far down the river valley and looks upward.

CHINESE REVERE THE PRESS

Burn Old Papers in Pagodas, Fearing Blindness.

Two years ago the Peking Gazette celebrated its millenary. Originally it appeared at intervals and in a very rudimentary form. Today it is modern, its diurnal publication being three editions.

Great changes have been made in fifty years, and since the Boxer rebellion the number and boldness of the newspapers have increased. There are seven different styles of writing—viz. the ancient, the literary, the flowery, the common, the "demivulgare," the familiar and the epistolary. The papers for the people are printed in the common style, and some have adopted the new alphabet sanctioned by the government.

Greater reverence is shown to the press in China than in other countries. Old papers are never put to base uses. They are collected and burned in the pagodas. The Chinaman believes that profanation of newspapers is followed by blindness.

AVIATION SUNBURN IS LATEST

Atlantic City's Curious Ones Victims. Dilatory Air Sailors Cause.

The flying machine demonstrations at Atlantic City boomed the sale of sunburn lotion. Bathers remained in the surf for a longer period than they planned when they first entered the breakers because of the tantalizing postponement by aviators from hour to hour awaiting the wind to die down.

Others remained exposed to the sun on the beach and on the board walk for like reasons. When the sun is brilliant it leaves its caress or impression upon all exposed cuticle, and there are thousands of visitors who suffered what they call "aviation sunburn." The druggists had just the thing to relieve the smarting, with the resultant effect of this filling rapidly.

Edward's Death Affects Styles.

To be fashionable next fall men must wear mourning, the advance styles being black patterns, with just a sprinkling of white spots to relieve in a slight degree the somber effect. London is mourning the death of King Edward, and London is where they create styles for men.

Umbrellas

The 50c kind going now 25c
Good Calico in blue and Shirting prints the 5c kind at 4c.
Big line mens pants worth \$1.50 our price 98c

Dont forget to call for your ticket with cash purchase. Get one of the handsome prizes we are giving away. Investigate our prices examine our goods and be convinced that we are the people that are willing to live and let live.

Yours truly,

Staton & Jones

Baptist Conference

Editor, Times:
Will you please publish the following announcement: Some of the pastors of the Carolina Baptist association met Monday, July 4, at the East Hendersonville Baptist church for the purpose of organizing a conference for the pastors of the association. Owing to the fact that it was a National holiday and also because of some slight misunderstanding as to the time of meeting, the permanent organization of the conference was postponed until the next meeting which will be held at the above-named place on Monday after the second Sunday in August at 10 a. m. It is hoped that every pastor of the association will attend on that occasion.
A. O. Allison, Sec. pro tem
