Every New Feature Is Represented In Our Collection Of New Spring Millinery

The small hat is the dominant feature, and the more dashing models show a front or side roll. The crowns form to the head. Creations are in Fushsia, the most popular Spring color, while there are browns, the new reds and greens and a generous showing of black. Hats of straw, combined with silk or ribbon, predominate, every model showing an original and distinctive note, defining the simplicity of the new mode.

You have a cordial invitation to come in and inspect our new arrivals in Spring Millinery. We have something to please every individual taste.

We have with us again, Miss Margaret Chesser, who will welcome all callers in the millinery department.
