Fence Posts That Last

Concrete fence posts need no paint or repairs; they cannot rot, but grow stronger with age. They present a neater, more efficient appearance and hold the wires securely—forming a safe enclosure for field or yard. They can be made indoors during the winter and set up in the spring.

If you make them yourself your building material dealer can give you an Atlas book that tells you how—or he can direct you to a concrete products plant where you can buy them ready made.

Of course, you will want to be sure your concrete is made with Atlas Portland Cement.
