ZeZ Confrey Mixes Salads and Songs

ZeZ Confrey, famous composer of the musical classic, "The Kitten on the Keys," is hailed by his friends as the most versatile of America's popular song composers. Those who know him say he can mix a salad or a song oddity with equal success, which is saying considerable since his portrayal of the delightful pranks of a certain young feline frisking over the ivories has been recognized as the model of American syncopation.

But Mr. Confrey has other "firsts" in his repertoire, his acquaintances declare. Country bred, he is a judge of horse flesh, and also knows a good cigar.

The simple life is Mr. Confrey's idea of happiness. Every so often Manhattan gets too crowded for him and he boards a train for the country and the companionship of a certain murmuring brook. Inevitably he comes back with one of the merry tunes for which he is noted.

A bachelor, ZeZ keeps open house for his friends. If he invites a few of the boys over for a midnight supper, he does the cooking himself. Invitations to his lively little dinners are sought after. There are two dishes to which Mr. Confrey is partial. So are his friends. His recipes for the two follow:

Royal Eggs With Mushroom Sauce.
12 eggs
Salt
Pepper
1-2 pound mushrooms
1 slice pimento
2 tbsp. butter
12 slices toast

Saute the mushrooms in two tsp. butter, taking care not to burn; make a white sauce of two tsp. butter, flour, evaporated milk and meat stock. Cook five minutes. Add the cooked mushrooms and chopped pimento. Break eggs and drop into hot fat, being careful to keep egg in a globular mass. Just as soon as they are a golden brown lift out and drain. Place an egg on each piece of toast. Allow two pieces for each serving. Four over all the mushroom sauce and garnish with parsley.

Pineapple-Cheese Salad.
10 slices pineapple
1 cup cream
1 cup cheese
1/2 cup chopped nuts
2 tbsp. evaporated milk

Combine the cheese, nuts, evaporated milk, pineapple juice and sugar, and blend into a smooth mass. Cut pineapple circles in half. Spread cheese mixture on a slice of pineapple and press the other half circle of pineapple on top of cheese as one would a slice of bread in making a sandwich. Cut diamonds or triangles from green and red mangoes and press into the edge of the cheese mixture between the pineapple. Lay two of the prepared pieces of pineapple on a crisp lettuce leaf. Serve with creamy salad dressing. This serves five.

Spilt Milk Costs Uncle Sam \$77,399,685.00 Annually

It takes a herd of 667,597 cows each giving 500 lbs. of milk yearly to supply the milk wasted annually in the U. S.

The amount of milk spilt, soured, rejected and otherwise wasted annually, is 3,339,986,000 pounds. This at \$2.25 per hundred would approximate annually the stupendous amount of \$77,399,685.

However, a cheerful note rings through this tale of economic loss to a nation. The same report shows a 1924 increase of 198 pounds of milk per cow over 1923 production. Deducing this from the figure previously given, leaves a loss through waste of only \$13,607,525, a mere bagatelle, compared with our national debt of more than twenty billions of dollars.

The increased yield per cow is due to heightened efficiency on the farm; and future years promise even greater increases.

Dairymen have discovered the futility of feeding non-paying members of their milk herds. They have learned that losses lurk in insanitary milk production. They have discovered the advantages that lie in swabbing the bacteria that hide in unclean stables, unclipped, unbrushed flanks and udders of milk cows and unsterilized utensils. As time goes on, the unavoidable waste of milk will be more than offset by intelligent feeding, complete sanitation and more efficient herd management.

According to a schedule showing the division of dairy products, published by the United States Department of Agriculture, the annual cost of wasted milk in our nation would make a happy pay day for the army and navy and still leave an appropriation sufficient to build enough combat planes to satisfy even the militant Mitchell.
