FIRE PROTECTION FOR LAKE LURE

Chimney Rock, May 4.—Marking the beginning in the southern hardwood region of extensive forest protection by private enterprise, steps have been taken by Chimney Rock Mountains, Inc., to provide in the immediate future a comprehensive fire-fighting and protective system which will embrace a full-time warden and assistants, lookout towers, patrols during dry seasons, modern equipment and a fire truck. This will be augmented upon the completion of Lake Lure by the latest type of fire boat for use in the protection of the myriad motor and other craft expected to frequent the 1,500 acre lake, as well as reducing the fire hazards upon the extensive waterfront properties now being developed. Selection of J. T. Alexander, now district fire warden under the North Carolina conservation and development has been made to bring about the desired system, according to announcement of Dr. L. B. Morse, head of the organization now creating the Lake Lure resort. Necessary equipment for the protective system has already been ordered.
